

Request for Information

January 2025

Dear Customer,

Thank you for your recent request for information. Conducting our operation in accordance with all applicable laws, regulations, national, and international standards, is a priority for everyone in our company. We are also committed to treating our customers, suppliers, employees, and communities with honesty, fairness, and transparency. To that end, we maintain a variety of management systems in accordance with national and international standards (ISO 9001, RC (ISO) 14001) which are externally certified.

Many customers have asked us to complete their supplier questionnaires. While we acknowledge the desire of our customers to be informed of their suppliers' internal management systems and processes, we also trust that you will understand our limitations to individually fill out and return each one. In an effort to address these requests in an efficient and effective manner, we have prepared the following summary of the most common information being requested, as well as links to the relevant areas of our corporate website.

If you find that this does not provide sufficient information to conduct business with SABIC, please reach out to your account manager or customer service representative for further clarification or additional requests.

Thank you for your understanding.

Regards,

Carlos Alcazar

Sr. Manager, Customer Service

SABIC Americas, Polymers

Polymers - Supplier Response
