FLEXIBLE POUCH
BERRY BPI GROUP

SABIC HDPE F00950
Oxygen barrier for pouch for food packaging containing 30% recycled feedstock, based on mixed plastic waste.

CHALLENGE
Delivering a recyclable food-packaging alternative to laminates for pouch and other packaging use that contains mixed plastic feedstock. Complete with oxygen and moisture barrier properties.

SABIC SOLUTION
Providing recyclability within packaging and utilizing certified circular polymers from a feedstock of mixed plastic waste that delivers the identical material performance as virgin feedstock.

SUSTAINABILITY CONTRIBUTION
By developing circular packaging solutions through renewable feedstock, SABIC contributes to waste reduction, recyclability and packaging performance.
