---

SABIC remains committed to be a key enabler of Saudi Vision 2030.

SABIC is committed to excellence as expected of a responsible global producer of chemicals.

SABIC’s governance framework aligns each governance element to the organization’s purpose and objectives.
STRATEGIC OVERVIEW AND BUSINESS MODEL
Headquartered in Riyadh, Saudi Arabia, SABIC employs more than 33,000 people in around 50 countries, working together to make the building blocks of the modern world ever better, ever more efficiently, and ever more sustainably.

**AT A GLANCE**

- **NET INCOME (SAR)**: 5.6 bln
- **ASSETS (SAR)**: 310 bln
- **SALES (SAR)**: 140 bln
- **PRODUCTION (METRIC TONS)**: 72.6 mln

- 33,000+ employees around the world
- 12,540 patent portfolio
- A+/stable/A1 highest standalone credit rating
- Top 3 chemical brand value
INSIGHTS FROM LEADERSHIP

Being part of a cyclical industry, we faced a challenging market landscape in 2019. However, such challenges are not new to SABIC. Our strategy is geared towards stable and long-term growth, and enables us to remain resilient to the headwinds.

Our annual performance demonstrates our long-standing ability to respond to market uncertainties, while we continue to plan ahead for the future, with the strength of our global scale and our customer-focused investments that help drive sustainability and innovation.

Our transformation program is designed to make substantial contributions to our bottom line, while delivering our 2025 ambitions with optimal levels of capital investment. To achieve this, we continued developing our leadership and talent, building our global brand, and helping advance Saudi Arabia’s development agenda.

To sustain our winning formula into the future, we understand the need to invest smartly to help us become more competitive. That is why we have been pursuing this strategy across our global operations.

In the US, we have broken ground on our Gulf Coast Growth Ventures joint venture project with ExxonMobil.

In Europe, we have placed an increased focus on our assets, enhancing our structural competitiveness and improving operational performance.

In Asia, we have carefully reshaped and recalibrated our operations to better address customers’ current and future needs. Our two dedicated hubs - Greater China and Rest of Asia – can now deliver more intuitive and localized services.

All in all, we are investing across our business to leverage the advances of global digitalization technologies and ensure we remain competitive. We are also responding to the structural challenges in the global marketplace by restructuring our businesses, driving cost discipline and increasing growth.

SABIC is already seeing the positive gains of change - for instance, through the successful reorganization project for our Agri-Nutrients business. This has effectively streamlined operations, maintenance and project execution.

SABIC has also maintained its momentum to enable Saudi Vision 2030 by helping stimulate the national economy and local content. Our Nusained™ program is our local content initiative designed to promote growth, diversification and job creation toward achieving the Vision. Our global partnerships and presence in more than 50 countries around the world helps attract investments and bring in international expertise. These efforts contribute to enhancing the capabilities of local industries to compete and grow globally. SABIC is also helping raise the level of exports, achieve trade balance, and drive GDP growth.

Acknowledging our excellence in Investor Relations activities, Institutional Investor recognized us for “Best Investor Relations Program in Chemicals” covering the emerging Europe, Middle-East and Africa regions.

We launched a global brand campaign in 2019, connecting our vision and purpose to real world benefits. Earlier in the year, Brand Finance magazine ranked our brand as the third most valuable among the world’s chemical companies, making us among the top 500 global brands – a matter of tremendous pride to all of us.

As SABIC’s future growth and development is largely dependent on creating solutions for the major issues facing society today and tomorrow, we remain committed to providing successful, sustainable solutions that create value for global communities as well as generate growth for our business. We have developed circular solutions with chemically recycled mixed plastic waste, and in January 2019, we joined the newly formed global organization, Alliance to End Plastic Waste, as a founding member.

SABIC also maintained its pace of investments in people and talent development to help our customers and partners navigate the shifting and unpredictable global macroeconomic environment, help solve society’s challenges, and drive sustainable development – as we move toward a vibrant future.

We have adopted a realistic approach for 2020 in the face of a slowing global economy and volatility in oil and petrochemical product prices. As our history has demonstrated time and again, we are confident of growing our brand and shaping our future growth and competitiveness – and continue delivering “Chemistry that Matters™”.

Our transformation program is designed to make substantial contributions to our bottom line, while delivering our 2025 ambitions with optimal levels of capital investment. To achieve this, we continued developing our leadership and talent, building our global brand, and helping advance Saudi Arabia’s development agenda.

DR. ABDULAZIZ SALEH AL JARBOU
Chairman
Our success in 2019 can be attributed to the strong support from our key stakeholders, loyalty of our customers, and commitment to excellence by our global employees.

We posted a net income of SAR 5.6 billion in 2019, sales of SAR 139.7 billion, while production reached 72.6 million metric tons.

The petrochemical industry, including SABIC, was impacted in 2019 by additional new supply in key products reaching on-stream, coupled with a moderation in global growth which resulted in lower profitability compared to 2018. However, our strong focus on safe and reliable operations and cost controls mitigated some of these challenges in 2019. This is evidenced by the 4% reduction in our SGA (Selling, General & Administrative) expenses compared to 2018.

We maintained our third position among global diversified chemical companies in the Forbes annual ranking of the world’s biggest companies. This ranking is a strong reflection of our continued emphasis on executing objectives against our robust transformation program to further streamline our operating model, increase portfolio focus, boost competitiveness, and accelerate growth.

We are proud of the growing strength of our global brand, demonstrating the success of our long-term brand strategy. Our brand value increased by 9.3% from US$ 3.96 in 2019 to US$4.33 billion this year reflecting the increasing perception of SABIC among our customers and other stakeholders. This recognition from the independent brand valuation consultancy, Brand Finance, came at a time when we launched our first-ever global brand advertising campaign, Brand Finance, at a time when we launched our first-ever global brand and advertising campaign, as part of our strategic effort to raise brand awareness and perception of SABIC amongst relevant global target groups.

We continue to believe that innovation is indispensable to our success. That is why in 2019, we initiated changes in our Technology and Innovation organization to make it more focused, lean, and agile, and become one of the main drivers of our growth. The organization will continue to stimulate profitable innovation by developing the right portfolio, including processes, assessments, and metrics, toward becoming a market-focused innovation powerhouse.

We remain committed to support Saudi Vision 2030. Our Nasuaneel™ local content program advanced in 2019 with the quotient of 85% to invest in the Saudi market. The Sixth meeting of the Nasuaneel Executive Council announced a series of projects that will contribute about SAR 6.1 billion to the GDP and create 3,149 job opportunities.

We have demonstrated once again that we can maintain our position as a successful and leading global player in the chemical industry, and continue to drive performance for our shareholders.

Our transformation program, which was first launched in 2015, has gone beyond being an undertaking, project, or task, and is becoming an entrenched competitive advantage, hardwired in the way we do business. Our partnership with ExxonMobil on Gulf Coast Growth Ventures in Texas is well on track with the construction phase of the petrochemicals complex launched in September. We expect the project to start up in 2022.

In 2019, we agreed to defer discussions on the possible merger of our specialties business with Clariant AG because of market conditions. We will resume discussions with Clariant once stability returns to the market as we maintain our strategy to become one of the leading players in the specialties business globally.

Another major strategic move in 2019 was our share-purchase agreement with SAFCO, under which it will acquire the newly formed SABIC Agri-Nutrients Investment Company from the investing companies, thus increasing our shareholding in SAFCO to 50.1%.

We also merged two of our manufacturing affiliates, Sadaf and Petrokemya, to create a more efficient platform to optimize assets and utilize the full potential from the synergies between their product streams. The move is also expected to create more effective and streamlined operations, maintenance and project execution.

The success of our Environmental, Social and Governance performance was reflected in the key initiatives we took in 2019. In April, our global headquarters in Riyadh was certified as a carbon-neutral site. SABIC was also among the global chemical industry’s first to achieve the British Standards Institute’s PAS 2060 carbon neutrality standard.

Our investment in carbon offsets covered the nearly 44,000 metric tons of greenhouse gas emissions from our Riyadh global headquarters. UN-issued carbon credits for efficiency projects at our Jubail manufacturing facility helped make SABIC the only Saudi company to achieve UN carbon credits.

We continued to communicate sustainability and innovation to respond to the dynamic needs of our customers and help create new solutions. As a founding member of the Alliance to End Plastic Waste, we have scaled up the chemical recycling of plastic waste back to the original polymer. Under our newly launched TRUCIRCLE initiative, we are also focusing on advanced circular products such as certified renewable polyethylene and polypropylene.

SABIC’s strategy of creating growth through its talent has long been one of our priorities. Our leaders are expected to take personal responsibility to develop the next generation. Toward this direction, in 2019, we maintained the pace of our “SABIC Leadership Way” journey through a series of interactive sessions with our leaders across 50 global sites, looking at how we could further develop our people and help them thrive, along with our business.

Safety remains the mainstay of our work culture. It is independent of any cyclical business environment or financial performance. Realizing that safety has assumed a new dimension in this new world of hyper-information, we have sought to reinforce the sense of responsibility in our workforce. Our intense cyber security campaign in 2019 advised employees on how best to secure SABIC data and be the first line of defense against any possible cyberattack.

Additionally, we are leveraging advances in global digitalization technologies to help us become more competitive by creating a digital work environment for employees, with automated solutions to increase productivity. Our corporate digitalization strategy aims to improve our commercial capabilities considerably in many areas including pricing, manufacturing, supply chain and innovation by capitalizing on artificial intelligence, machine learning, and by becoming a more data-driven company.

Besides digitalization, we initiated two new programs in 2019: Manufacturing Fixed Cash Cost Optimization (MFCCO) and @Europe. While MFCCO is driving more efficient, safe and reliable production, @Europe addresses asset repositioning and improvement in industry and cost positioning in the face of ongoing challenges in Europe. We are earnestly advancing these ambitious programs.

For the coming year and beyond, we will continue to maintain capital discipline and invest in our people and safe and reliable operations while supporting profitable long-term growth as we move toward a vibrant future and strengthen our purpose of “Chemistry that Matters”.
OUR CORE VALUES

Our values serve as the foundation of our organization and culture. They govern our behavior and drive our commitment to act with the highest ethical standards. We have integrated them in the fabric of our organization to be a reference point for our business practice and to ensure successful implementation of our strategy.

INSPIRE
We work together to create an action-oriented environment that develops solutions and results for our customers.

ENGAGE
We respect and value differences in our people and their business approaches, fostering a great working environment. Our unfailing commitment to the communities in which we operate helps us remain a positive influence throughout the company and the world.

CREATE
Our curiosity is never satisfied and we are always challenging conventional thinking and seek new ways to uncover opportunities in both product and process to find the next innovative solution.

DELIVER
We lead by developing extraordinary breakthroughs for our customers and our unwavering focus on flawless execution drives our success.
SABIC’s strategy sets forth a roadmap for the company to realize its vision of becoming the preferred world leader in chemicals and a true global powerhouse in the industry by delivering ‘Chemistry that Matters’.

Our Strategy

Sustaining our competitive advantage rests on seven pillars that are critical to who we are: Customer Focus, Market Focus, Operational Excellence, Innovation, Portfolio Management, Transformation and Localization Engine.

Customer Focus
We work hard to understand the evolving needs of our customers in terms of service, product differentiation and solutions.

Market focus
We aim to accelerate growth both organically and non-organically by being close to regional markets. In our Petrochemicals business, for example, we aim to establish an asset base in the US to take advantage of shale gas opportunities, to expand in Asia where the maximum market growth is, to strengthen our asset base in Europe, and to deliver further growth in Saudi Arabia while taking advantage of our proximity to MEAF markets.

Operational excellence
We aim to improve efficiencies in our core areas of manufacturing, commercial, supply chain and cost management.

Innovation
We strive for competitive advantage selectively through process, catalyst and application development. Sustainability is central to our focus on how we run our business and address current and future challenges.

Portfolio management
We aim to prioritize strategic options and capital allocation within SABIC’s portfolio of businesses.

Transformation
We will continue enhancing SABIC’s organizational effectiveness by investing in leadership, training and culture and by improving our operating model.

Localization engine
We aim to further develop the communities within Saudi Arabia. We work hard to further catalyze local content growth in Saudi Arabia through a structured program of leveraging SABIC capabilities.
SABIC remains committed to being a key enabler of Saudi Vision 2030: a bold and ambitious drive to reduce Saudi Arabia’s dependence on hydrocarbon exports, and build a broad-based economy for a sustainable future.

SABIC is developing programs to help the creation and development of small and local businesses, leveraging its core strengths in technology and intellectual property, providing skills, materials and access to financial support, and helping disseminate global best practice. We also continue to work on developing mutually-beneficial partnerships with governments in Saudi Arabia and overseas, foreign investors, financial institutions, and complementary commercial organizations. Leveraging our global networks, industry-leading performance, innovation, and creativity in the design and execution of programs to deliver real, effective support where it’s needed, we will continue to play a central role in transforming Saudi Vision 2030 into reality.

**NUSANED™ this year received 882 investee registrations. 453 were approved and moved to the pre-feasibility stage; 205 were moved on to the next stage; 132 were approved, having completed their full feasibility studies; and 62 graduated with full support packages, addressing 8 out of 12 targeted clusters of Saudi Arabia’s national industrial strategy.**

The NUSANED™ Executive Council has signed a number of agreements under its EXSABIC initiative, which seeks to create jobs for Saudi youth by providing on-job training from three to seven months at SABIC sites and affiliates in Saudi Arabia. The initiative aims to qualify national talents to support local companies that contribute to increasing local content in order to meet the objectives of Vision 2030.

**NUSANED™ is a SABIC initiative that has become a national platform, bringing together public and private sector institutions to help small businesses get started and assist established ones to grow.**

**OPERATIONAL EXCELLENCE**

**INNOVATION**

**CUSTOMER FOCUS**

**MARKET FOCUS**

**PORTFOLIO MANAGEMENT**

**TRANSFORMATION**

**LOCALIZATION ENGINE**

**BUSINESS PORTFOLIO**

SABIC operates through three strategic business units (SBUs) and Metals (Hadeed):

- **PETROCHEMICALS**: Commodity & Performance Chemicals and Polymers
- **SPECIALITIES**: Specialty Plastics
- **AGRI-NUTRIENTS**: Fertilizers and Specialty Agri-Nutrients
- **METALS (HADEED)**: Flat and Long Metal Products
- **SPECIALITIES**: Specialty Plastics

**DIVERSIFIED GLOBAL FOOTPRINT**

- 50 Operations around 50 countries
- 68 Manufacturing sites
- 21 Technology and Innovation Centers
- 100+ Countries of sales

**STRATEGIC PILLARS**

- Customer Focus
- Market Focus
- Operational Excellence
- Innovation

SABIC remains committed to being a key enabler of Saudi Vision 2030: a bold and ambitious drive to reduce Saudi Arabia’s dependence on hydrocarbon exports, and build a broad-based economy for a sustainable future.

SABIC is developing programs to help the creation and development of small and local businesses, leveraging its core strengths in technology and intellectual property, providing skills, materials and access to financial support, and helping disseminate global best practice. We also continue to work on developing mutually-beneficial partnerships with governments in Saudi Arabia and overseas, foreign investors, financial institutions, and complementary commercial organizations. **NUSANED™** this year received 882 investee registrations. 453 were approved and moved to the pre-feasibility stage; 205 were moved on to the next stage; 132 were approved, having completed their full feasibility studies; and 62 graduated with full support packages, addressing 8 out of 12 targeted clusters of Saudi Arabia’s national industrial strategy.

The NUSANED™ Executive Council has signed a number of agreements under its EXSABIC initiative, which seeks to create jobs for Saudi youth by providing on-job training from three to seven months at SABIC sites and affiliates in Saudi Arabia. The initiative aims to qualify national talents to support local companies that contribute to increasing local content in order to meet the objectives of Vision 2030.

**NUSANED™ is a SABIC initiative that has become a national platform, bringing together public and private sector institutions to help small businesses get started and assist established ones to grow.**
Muahal, the workforce development arm of NUSANED™, focuses on creating new jobs, localizing current ones, and enhancing local employers’ capabilities. In 2019, it helped create 2,215 jobs for Saudi workers, while enhancing the capabilities of 85 women and qualifying them for rubber technology industries. Besides, 70 Saudi entrepreneurs have been qualified to start their own ventures with their business ideas – from inception to implementation.

Besides Muahal, NUSANED™ has three other pillars: Entema – an opportunity gate to invite, receive and analyze investor opportunities, evaluate them and determine their feasibility; Da’aem – facilitates SABIC support for approved investment opportunities; and Investment Funds – identifies and facilitates financing solutions for commercially feasible projects.

**Operational Excellence Initiative**

A NUSANED™ event in September saw the launch of a new program – NUSANED™ for Excellence. The program’s incubation phase aims to establish and prove an Operational Excellence methodology that can help improve Saudi industrial efficiency and productivity.

In a later phase, the initiative will look to support small and medium enterprises – including companies benefiting directly from NUSANED™ – with qualified female recruits whose skills have been built up by training and on-the-job experience in relevant roles within SABIC, with support and guidance from senior colleagues.

**Import Substitution**

In support of differentiated local industries and to replace imported products, SABIC has successfully secured and delivered the first and second batches of butadiene to Global Downstream Industries (GDI) to produce sulfolane. The deal will enable GDI to set up a world-scale complex for the production of a wide-range of downstream specialty chemicals in Jubail Industrial City. The deal is expected to make a number of currently imported products available locally to various industries such as aromatic industries, pharmaceutical industries and agriculture.

**Employment of Women**

SABIC, led by its Local Content and Business Development Unit (LCBDU) and Corporate Human Resources, launched a new initiative in November 2019 to boost the employment of women in the industrial sector.

The program aims to provide small and medium enterprises – including companies benefiting directly from NUSANED™ – with qualified female recruits whose skills have been built up by training and on-the-job experience in relevant roles within SABIC, with support and guidance from senior colleagues.

Women participating in the program are offered the chance to work in SABIC or one of its affiliates for between 4 and 12 months, gaining skills and expertise that will help them compete in the local labor market, and ultimately apply them to the benefit of their new employer.

**Maintaining Momentum**

Over the coming years, we will continue to leverage our resources, including the Home of Innovation™ in Riyadh and our global technology centers, in support of the drive for a strong, growing and sustainable national economy that can provide jobs for Saudis, and meet their needs into the future.

Our Local Content initiative will be key to attracting investments in innovation and technology, procurement and manufacturing, and in helping create thousands of new jobs for Saudis, to maintain our momentum and our progress toward meeting the objectives embodied in Saudi Vision 2030.

We will continue to leverage our resources in support of the drive for a strong, growing and sustainable national economy that can provide jobs for Saudis, and meet their needs into the future.
MARKET REVIEW
2019 BUSINESS ENVIRONMENT

The global economy experienced a synchronized slowdown in 2019 with many advanced and emerging economies contributing to the global economic slowdown.

REGIONAL ECONOMIES
The Saudi government’s reforms to diversify and transform the economy under Vision 2030, along with greater public spending and investment, boosted Saudi non-oil sector growth in 2019. However, the Saudi non-oil sector growth in 2019 was somewhat robust in 2018, as oil prices were high enough to trigger a global recession. In fact, uncertainties surrounding global trade and Brexit started subsiding at the end of 2019 after increased likelihood of a phase-one trade deal between the US and China and a conclusive victory of the conservative government in the UK election in December 2019.

ADVANCED AND EMERGING ECONOMIES
Advanced economies grew at a modest pace in 2019, after recording a moderate growth rate in 2018. Their economic slowdown in 2019 reflected a deterioration in fixed investment, industrial production—particularly manufacturing—and global trade, as well as aging demographics. Emerging economies also recorded a broad-based slowdown in real GDP growth in 2019. The latest boom in global investment, trade and industrial production faded in 2019 under the impact of capacity constraints in advanced economies, rising global protectionism and high global debt. In particular, the trade conflict between the US and China hurt business and investor sentiment around the world. As a result, global economic growth, which was somewhat robust in 2018, became moderate in 2019.

In response to the declining economic growth, policymakers in many countries started providing more monetary and fiscal stimulus. Economic risks remained elevated in 2019, but not high enough to trigger a global recession. In fact, uncertainties surrounding global trade and Brexit started subsiding at the end of 2019 after increased likelihood of a phase-one trade deal between the US and China and a conclusive victory of the conservative government in the UK election in December 2019.

The US Federal Reserve Bank reversed its monetary policy stance in 2019 and cut interest rates three times in response to the slowdown in US economic growth. Capacity constraints also remained a drag on economic growth. The US Federal Reserve Bank reversed its monetary policy stance in 2019 and cut interest rates three times in response to the slowing domestic and global economic growth and elevated downside risks. As a result, financial conditions improved in the US in 2019.

China’s long-term, structural economic slowdown continued in 2019. Almost all major sector of the economy including industrial production, private consumption, exports, construction activity and auto sales slowed in 2019. The slowdown was driven primarily by the government’s deleveraging drive that dampened domestic demand, as well as the trade conflict with the US that hit exports and heightened uncertainty for businesses. The Chinese government implemented a stimulus package dominated by tax and business fees cuts and shifted bank lending to small and medium-sized private firms. The stimulus package partially offset the adverse impact of the US-China trade conflict on the Chinese economy.

The Eurozone recorded a slowdown in economic growth in 2019, after growing above its potential growth rate in 2018. All major economies of the Eurozone experienced a decline in economic growth in 2019. Exports and manufacturing were the principal source of weakness, struggling in the face of multiple headwinds, including global trade protectionism, the chaos around Brexit and Italy’s political issues. High uncertainty also depressed private consumption growth. However, investment proved surprisingly resilient to high uncertainty, possibly because of a highly accommodative monetary policy of the European Central Bank (ECB) and somewhat easy financial conditions.

INDUSTRY TRENDS

PETROCHEMICAL INDUSTRY TRENDS
Global petrochemical capacity continued to grow during 2019, driven mainly by expansions in the US and China. Global petrochemical capacity continued to grow during 2019, driven mainly by expansions in the US and China. Increasing availability of highly competitive US feedstock led to increases in production and market share for US exports around the globe. These increases in capacity led to more supply and higher competition with negative impact on prices. Global operating rates were also impacted as it retreated from above 80% level to slightly below this level. On the other hand, global demand grew at lower pace due to persistent low global GDP growth and uncertainty from the trade dispute, geopolitical tensions and Brexit.

The US Federal Reserve Bank reversed its monetary policy stance in 2019 and cut interest rates three times, resulting in improved financial conditions.
BUSINESS PERFORMANCE
BUSINESS PERFORMANCE

An overview of SABIC sales, income from operations, net income for the year, assets, equity and liabilities and cash flows.

SALES
SABIC’s sales revenue for 2019 was SAR 139,737 million, a decrease of SAR 29,391 million or 17%, compared to SAR 169,128 million in 2018. This decrease was mainly attributable to lower average sales prices partially offset by lower cost of goods sold by SAR 7,070 million or 6%, lower general and administrative expenses by SAR 784 million or 4%, and lower selling and distribution expenses by SAR 700 million or 4% compared to 2018.

The sales revenue for Petrochemicals and Specialties SBUs amounted to SAR 121,829 million, which represents 87% of total SABIC revenues, had decreased by SAR 28,594 million or 19% compared to 2018. The sales revenues for Agri-nutrients SBU, amounted to SAR 7,118 million, had also decreased by SAR 820 million or 10% in 2019. The sales revenues of Hadeed, amounted to SAR 10,790 million, had increased by SAR 22 million or 0.2% compared to 2018.

SABIC’s sales volume for 2019 slightly increased by 3%. The sales volume of Petrochemicals and Specialties SBUs increased by 3%, whereas the sales volume of Agri-nutrients SBU and Hadeed decreased by 3% and 2% respectively.

INCOME FROM OPERATIONS
SABIC’s income from operations for 2019 was SAR 14,833 million, a decrease of SAR 21,447 million or 59%, compared to SAR 36,280 million in 2018. The decrease was mainly attributable to lower average sales prices partially offset by lower cost of goods sold by SAR 7,070 million or 6%, lower general and administrative expenses by SAR 484 million or 4%, and lower selling and distribution expenses by SAR 390 million or 4% compared to 2018.

Cost of sales for 2019 was SAR 104,217 million, a decrease of SAR 7,070 million or 6%, compared to SAR 111,287 million in 2018. The decrease was mainly resulted from the decrease in feedstock prices, partially offset by impairment charges amounted to of SAR 3,669 million.

Selling, general and administrative expenses for 2019 were SAR 20,687 million, a decrease of SAR 874 million compared to SAR 21,561 million in 2018. The decrease was mainly resulted from the continued focus on our cost structure.

NET INCOME FOR THE YEAR
SABIC net income for 2019 was SAR 5,563 million, a decrease of SAR 15,958 million or 74%, compared to SAR 21,520 million in 2018. The decrease was mainly attributable to a lower operating income from operations and the share of loss of associates and joint ventures.

Share of results of associates and joint ventures for 2019 was a loss of SAR (1,595) million compared to a profit of SAR 1,050 million in 2018. This was mainly resulted from an impairment charge for the investment in Clariant AG amounted to of SAR 1,515 million due to the drop in fair value of the investment, in addition to lower results from our joint ventures mainly from SSTPC and other associates resulted due to the lower average sales prices of petrochemical products.

Finance costs, net for 2019 was SAR 1,427 million, which increased by SAR 204 million or 17%, compared to 2018. It is mainly due to the decrease in finance income resulted from the lower income from fixed time deposits.

Zakat expenses for 2019 was SAR 2,100 million, which is lower by SAR 500 million compared to SAR 2,600 million in 2018 due to a lower zakat base and a review of the overall Zakat provision.

Income tax expenses for 2019 was SAR 1,119 million, a decrease of SAR 79 million or 7%, compared to SAR 1,198 in 2018, primarily resulted from the lower profits partially offset by movements in the deferred tax position and uncertain tax provisions.

ASSETS
Total assets for 2019 reached SAR 310,366 million, a decrease of SAR 9,345 million or 3%, compared to 2018. The decrease was mainly attributable to a decrease in current assets by SAR 9,345 million or 3%, compared to 2018. The decrease was mainly attributable to a decrease in cash and cash equivalents and short-term investments by SAR 8,535 million as a result of the lower cash from operation in line with the declining profits and certain debt repayments. Also, inventories and account receivables decreased by SAR 1,631 million and SAR 3,499 million, respectively, as a result of the lower feedstock prices and lower average sales prices for petrochemicals.

Non-current assets increased mainly due to the adoption of IFRS 16 “Leases”, resulting in a balance of SAR 7,295 million due to the capitalization of “right of use” assets. This was partially offset by a decrease in property, plant and equipment by SAR 829 million and intangible assets by SAR 549 million mainly due to the impairments and write-offs charges, amounted to SAR 3,876 million. Also, a decrease in investments in associates and joint ventures of SAR 2,430 million, mainly due to the impairment for the investment in Clariant AG by SAR 1,515 million, and lower results and cash dividends from associates and joint ventures.

EQUITY AND LIABILITIES
Our Financing Policy aims at ensuring sufficient liquidity levels at all times, while optimizing the returns to our shareholders. We use leverage prudently to fund our global growth ambitions. Our strong credit profile and corporate credit ratings (A+/stable/A1) on a standalone basis reflects the strength of our financing strategy and its execution. We evaluate the most optimal capital and financing structure to support our strategic plans and growth ambition.

Our primary sources of liquidity are the cash flows generated from our operations and borrowings under committed bank facilities. The primary use of this liquidity is to fund our ongoing operations and our capital expenditure requirements, including investments in joint ventures and other minority owned investee companies as well as dividend distribution to our shareholders.

Equity attributable to equity holders of the parent for 2019 reached SAR 168,761 million, a decrease of SAR 4,322 million or 2%, compared to 2018. The decrease is mainly attributable to cash dividends amounted to SAR 13,200 million, and other comprehensive loss by SAR 1,921 million mainly due to the re-measurement on employee benefits and foreign currency translation movements. This was partially offset by the 2019 net income generated amounted to SAR 5,563 million and the acquisition of an additional ownership interest in Saudi Methanol Company (“Ar-Razi”) by SAR 5,220 million. Considering this transaction is related to the acquisition of an additional ownership interest in a subsidiary without a change of control, accordingly, it has been accounted for as an equity transaction and excess consideration over the carrying amount of the non-controlling interests is recognised in equity attributable to the Parent.

Liabilities for 2019 reached SAR 99,114 million, an increase of SAR 840 million or 1%, compared to 2018. The increase was attributable to the increase in non-current liabilities by SAR 1,273 million partially offset by a decrease in current liabilities by SAR 433 million. Non-current liabilities increased due to an increase in employee benefits mainly resulted from the decrease in the discount rate in and outside the kingdom and the increase in lease liabilities by SAR 5,114 million due to the adoption of IFRS 16 “Leases”. This was partially offset by a decrease in long term debt due to repayments and reclassification of SAR 7,232 million.

The decrease in current liabilities resulted from the decrease in trade payables and other current liabilities mainly due to the lower feedstock prices, lower dividends payable and zakat payments. Short term debt and current portion of long term debt increased due to long term debt becoming due, and the adoption of IFRS 16.

Below is an overview of the total debt portfolio as of 31 December 2019:

CASH FLOWS

Net cash generated from operating activities for 2019 was SAR 35,573 million, a decrease of SAR 9,198 million or 21%, compared to 2018. The decrease was mainly attributable to lower income before zakat and income tax by SAR 24,001 million in 2019.

Net cash used in investing activities for 2019 was SAR 13,690 million, a decrease of SAR 15,914 million or 54% compared to 2018. This is mainly attributable to the lower cash outflow in investments in associates and joint ventures by SAR 10,617 million and the cash inflow from sale and maturities of short-term investments by SAR 4,860 million, compared to a cash outflow by SAR 5,280 million in 2018. This was partially offset by higher spending on capital expenditure during 2019 by SAR 5,453 million.

Net cash used in financing activities for 2019 was SAR 26,287 million, a decrease of SAR 5,389 million or 17%, compared to 2018. The decrease was mainly due to lower net debt payments by SAR 6,421 million. In addition, a net consideration received from “JSMC” the partner in Ar-Razi, of SAR 1,125 million in relation to an additional 25% of shares in Ar-Razi and to renew JVA for 20 years. These were offset against the additional lease payments of SAR 1,534 million as a result of adoption of IFRS 16 – Leases.

Cash and cash equivalent at the end of the year 2019 was SAR 36,966 million, a decrease of SAR 4,457 million or 11%, compared to 2018, mainly due to lower cash generated from operations.

Free cash flow for 2019 was SAR 15,718 million, a decrease of SAR 14,817 million or 49%, compared to 2018.

Note:
- Details of affiliates, joint ventures and associated companies in the financial statements, where appropriate, are listed in the Appendix.
- Details of stocks and debt instruments issued by each affiliate are listed in the Appendix.
- Financial numbers before 2016 are based on SOCPA.
- USD/SAR Rate: 3.75.
- Certain prior period figures have been re-classified to confirm with the presentation in the current period.
BUSINESS SEGMENT ANALYSIS
SABIC operates through three Strategic Business Units (SBUs) and Metals (Hadeed), a fully owned SABIC affiliate.

- Petrochemicals: manufacturing, distribution and sale of commodity and performance chemicals and polymers.
- Specialties: manufacturing, distribution and sale of specialty plastics.
- Agri-Nutrients: manufacturing, distribution and sale of fertilizers and specialty agri-nutrients.
- Metals (Hadeed): manufacturing, distribution and sale of long and flat metal products.

### PETROCHEMICALS

Petrochemicals is SABIC’s largest business unit, responding to the demands of our global customers for improved performance and sustainability. Its product portfolio covers the essential building blocks for a wide range of chemicals, polymers, and other materials used in various industries – from automotive to healthcare, from construction to household goods – besides sustainable solutions for the packaging industry. Its products include olefins, methanol, MTBE, aromatics, glycols, linear alpha olefins, polyethylene, polypropylene, polyethylene terephthalate, polyvinyl chloride, polystyrene, polycarbonate, and engineering thermoplastics and its blends. As an industry leader in multiple petrochemical segments, our ambition is to continue providing innovative solutions for our customers’ growth, and further grow our leadership position.

2019 continued to be another year of transformation for Petrochemicals, in line with SABIC’s overall global transformation process. Production enhancements continue to boost efficiency and productivity while strengthening our sustainability commitment. New formulations offer better performance and ever-greater flexibility to our customers, helping them create new and improved products in every industry we support, from transportation to packaging to medical devices; new end products emerging from collaboration testify to the benefits of mutually beneficial commercial relationships in delivering solutions that truly meet consumers’ needs; delivery improvements continue to extend our ability to get product where it’s needed, when it’s needed, to ever more parts of the world.

Wherever we produce, innovate, partner and supply, we continue to deliver innovative products to meet the world’s growing needs ever better, and develop circular solutions to minimize any environmental impact.

### OPERATING HIGHLIGHTS

#### PROCESS OPTIMIZATION, SUSTAINABILITY SOLUTIONS

Model Based Production Planning and Optimization (MBPPO) initiative, based on value-driven planning, encompasses a site-wide planning-optimization model covering feedstock selection, product mix, and plant conversion. The design’s modular architecture enables plant/global cross-fertilization, with affiliates’ individual planning models feeding into the evolving global corporate model, and vice versa, enabling comprehensive optimization, and ultimately maximization of overall gross margins.

Income from operations was SAR 13.8 billion (including Specialties SBU), a decrease of SAR 19.9 billion, -59%, compared to SAR 33.7 billion in 2018. The decrease was also attributable to lower average selling prices in addition to the recording of SAR 2.8 billion impairment provision in Ibn Rushd. SABIC’s share amounted to SAR 1.3 billion.

### FINANCIAL HIGHLIGHTS

Revenue in 2019 was SAR 121.8 billion (including Specialties SBU), a decrease of SAR 28.6 billion, -19%, compared to SAR 150.4 billion in 2018. The decrease was attributed to a drop in overall average selling price.
We are constantly expanding our pipe portfolio with new offerings.

Further advancements this year include:
- Chemical recycling for feedstock – we are investing in infrastructure and equipment that upgrades pyrolysis oil made from post-consumer mixed plastic waste into a suitable feedstock for our European crackers, which will be extended gradually to our other global assets. We are the first in the industry committed to scale up chemical recycling of mixed plastic waste to the original polymer – thus playing a leading role globally in turning plastic waste into feedstock and helping grow circular economy solutions. Under our TRUCIRCLE™ sustainability-focused product portfolio launched in 2019, we have developed advanced circular products from chemically recycled plastic waste to enable the circular re-use and recycling of packaging.
- Glycols plants – targeting 25% reduction in O, energy, and water intensities and 50% material effectiveness by 2025, compared with 2010 baselines, with projects across glycols plants. These projects will eventually lead to an improved glycols asset footprint.

IMPROVED PRODUCTS

Low Density Polyethylene (LDPE) antioxidant-free additive
SABIC LDPE antioxidant-free additive is a safe and sustainable solution for the food packaging industry, offering compliance with certain food regulations while boosting SABIC's social responsibility credentials.

Innovative materials for better packaging
SABIC’s new LDPE BX202 polymer for producing bi axiomally oriented polyethylene films on tenterframe lines supports recyclability by using mono-material PE structures in multilayer films. The new film also offers very good printability and mechanical properties including toughness, has exceptional sealing integrity to prevent leakage and waste, and is available as certified circular and certified renewable polymer. COHERE® 5 Series polyolefin plastomer, produced using NEXLENE® technology, offers excellent heat-sealing properties, clarity, toughness and elasticity, for integrity during transportation and storage.

Personal care
SABIC launched new grades of glycerin-refined grade for skin care, hair care and shaving gel applications, building our presence in this large and healthy global market.

Innovative automotive solutions
The faces of next-generation vehicles are changing. Front panels will replace traditional grilles and come with new aesthetic and functional requirements. To help drive development, we are collaborating with a worldwide leader in thin film technology, and other partners on innovative surface designs for our new automotive solutions.

Better for water packaging
SABIC’s NEXLENE® products offer alternative solutions to non-sustainable water bottles by eliminating a washing step during re-filling. SABIC’s double water pouch solution combines high performance, high purity and reduced washing water requirements.

Breakthrough material for Powder Bed Fusion technology
SABIC has developed first ever high temperature polyester-based MATEENSINT™ powder for Powder Bed Fusion technology, such as selective laser sintering. The material offers superior thermal, chemical and mechanical properties, expanding the space for 3D printed applications.

Looking Ahead
With the launch of two new hubs in Asia Pacific in 2019, Greater China and Rest of Asia, we look forward to responding to local demands with ease and flexibility, responding quickly to market volatilities, and further deepening our collaborative partnerships with customers and other stakeholders in this key marketplace.

Across our regions, we will continue to focus on better serving our customers through innovative thinking, and enhanced production and process control. We will continue to pursue our objectives and work toward SABIC’s vision: to be the preferred world leader in chemicals.
SABIC ANNUAL REPORT 2019

Now augment our in-house reach in the US, Canada and Mexico, with the product knowledge, application design, technical expertise and materials access to support customers in key industries. Increased production also aids our customers’ speed to market. Recommissioning of the PPE (polypropylene ether) plant in Bergen op Zoom, the Netherlands, with go-live planned for 2020, should boost global NORYL™ resin supply by 40%. Construction has also begun on a new ULTEM™ resin facility in Benoi, Singapore, scheduled for completion by 2021, and improving access for our customers in Asia.

Specialties’ portfolio of flagship products – NORYL™, ULTEM™, EXTEN™ and SILEN™ resins, a vast range of LNP™ compounds and copolymers, and a variety of thermosts and additives – helps meet complex thermal, mechanical, optical and electrical performance and sustainability requirements.

Specialties has also been hard at work developing new ways to help our customers meet the demands of the circular economy. UNIPOL® ECRIN™ IQ polybutylene terephthalate (PBT) compound resins, produced from recycled polyethylene terephthalate (PET) waste, reduce cradle-to-gate environmental footprint compared with virgin PBT resin, as assessed by both cumulative energy demand and global warming potential.

The introduction of 5G infrastructure and the burgeoning growth of 5G-compatible devices is another major driver. Sales of NORYL™ oligomers, a key component in new circuit board products for high-speed servers, base stations and wireless antennae, are up 130% year on year. Significant capacity expansions initiated in 2019 are set to be increased in 2020 and beyond, as global 5G rollouts continue to expand.

Advanced Driver Assistance Systems (ADAS) for conventional and autonomous vehicles are bringing a host of opportunities across the Specialties portfolio. ADAS rely on cameras, radar, LIDAR (Light Detection and Ranging) and other sensing systems, each with its own performance challenges.

For camera lenses, barrels and spacers, ULTEM™ resins offer infrared transparency, and heat and chemical resistance; NORYL™ resins’ dimensional stability and low moisture uptake make them ideal for protective covers; and LNP™ compounds bring key attributes such as EMI (electro-magnetic interference) shielding, thermal management, and rigidity.

ADAS radar systems, which enable features such as adaptive cruise control, autonomous emergency braking and forward collision warning, need multi-component devices with a range of capabilities, from EMI shielding to impact protection, radar absorption to radar transparency. PCB antennas and control chips use NORYL™ SA resin, an oligomer that provides low dielectric loss, while back covers benefit from NORYL® and LNP® compounds’ rigidity, moisture resistance and thermal management.

LIDAR systems which can be built into vehicles’ front and rear fascias, or within the headlights, demand durability and optical clarity. Specialties materials offer greater design freedom, environmental resistance and infrared transparency than conventional glass and epoxy, as well as assembly efficiency advantages.

The Internet of Things and the increasing trend toward real time communications demand data speed, density and low latency; the electronics industry is forecasting demand for sensor and lens units running at millions per week. ULTEM™ and EXTEN™ resins are ideally positioned to address the need.

Zemax, the software standard for optical designers for analysis, simulation and optimization of prospective components and systems, helping them fully understand SABIC thermoplastic optical materials’ capabilities. The ULTEM™ resin, EXTEN™ resin, and two grades of EXAN™ CKT high-temperature copolymer, offer options with tangible advantages over traditional glass and epoxies.

The Specialties business creates value by pushing the boundaries of our materials’ physical properties to address important and highly complex thermal, mechanical, optical and electrical performance requirements: our customers’ most difficult – and often one-of-a-kind – challenges.

Specialties’ portfolio of high performance materials, collaborative mind-set, and engineering and application development expertise help our customers to achieve differentiation, sustainability or speed to market objectives required to create a competitive advantage.

SPECIALTIES

The Specialties business creates value by pushing the boundaries of our materials’ physical properties to address important and highly complex thermal, mechanical, optical and electrical performance requirements: our customers’ most difficult – and often one-of-a-kind – challenges. Specialties’ portfolio of high performance materials, collaborative mind-set, and engineering and application development expertise help our customers to achieve differentiation, sustainability or speed to market objectives required to create a competitive advantage.

Specialties’ “Growing Unique” strategy, centered on innovation and customization and geared to achieving a leadership position among global peers, continued to build momentum in 2019, with its unerring focus on one key driver: generating value for customers.

Key to this strategy, and to future organic and inorganic development, is establishing Specialties as a stand-alone organization, with its own financials and assets. Progress has been strong, with completion anticipated for 2020, set to bring financial transparency, increased agility, and an ever-deeper focus on customer-centricity.

NON-FINANCIAL HIGHLIGHTS

Specialties sales volume also decreased due to the trade tensions between the US and China, which led to a slowdown in the major industries that use specialty products, such as automotive, electronics, and electric appliances. This led to a change in the trade tensions between the US and China, which Some of the Specialties products have been commodities and moved to Specialties SBU.

Collaborative mind-set, and engineering and application development expertise help our customers to achieve differentiation, sustainability or speed to market objectives required to create a competitive advantage.

OPERATING HIGHLIGHTS

2019 saw Specialties continue to focus on creating value for our customers by helping them solve their most challenging problems, through our expertise in materials, engineering and service, global reach and a personal, collaborative approach.

As a business focused on helping customers address the challenges and seize the opportunities of the fourth industrial revolution – artificial intelligence, renewable energy and electric transportation, 5G communications, smart electronics, healthcare and robotics – a clear grasp of our customers’ perspectives and needs is crucial.

Recent proprietary research highlighted customers’ enthusiasm for personal interaction, notwithstanding the proliferation of online information. Sparked by a significant anniversary of the launch of LNP™ product line, we organized technical summits in 19 major centers throughout Asia-Pacific, the United States and Europe, where more than 2,300 customers joined us to learn more about our innovations, material capabilities, application design and processing best practices.

In 2019, Specialties also increased its focus on customer service, not least by extending its distribution network. Already strong in Asia and Europe, the emphasis for 2019 was on North America. Two new distributors

AGRI-NUTRIENTS

SABIC Agri-Nutrients supplies customers throughout the Middle East, Far East, Africa and the US with a wide variety of fertilizers, from general to highly specific, helping address the world’s ever growing demand for food. The business unit’s product range includes urea, ammonia, and a comprehensive portfolio of nitrogen-based inorganic products.

This has been a year of scientific initiatives, new sales and territories, continuing to set the pace in helping meet the increasing global need for food, while also helping to safeguard the environment. The European Union this year led the world in recognizing plant bio-stimulants as distinct agricultural inputs. They updated regulations on polymer coated controlled release fertilizers to introduce biodegradability of the polymer coating. Germany mandated the use of urease inhibitors. Australia and New Zealand enacted new nutrient loss prevention regulations. New emissions legislation in India brought new possibilities for SABIC TGU (technical grade urea) products.

All over the world, the challenges of feeding the world – sustainably – continued to grow. SABIC continued building our capabilities to address these challenges. Our strategy within Agri-Nutrients is to maintain our customer-focused approach, which includes broadening our global asset footprints in base fertilizers, downstream integration and distribution, and increasing our share of differentiated products to 20% of the total product portfolio. We strive to develop highly efficient products and provide agricultural solutions that suit different agricultural crops in differing climatic and soil conditions.

FINANCIAL HIGHLIGHTS

Revenues in 2019 was SAR 7.12 billion, a decrease of SAR 0.82 billion, or 10%, compared to SAR 7.94 billion in 2018 due to the implementation of the SAFCO-3 reliability project and performing of scheduled maintenance activities, besides non-availability of main products of Al-Bayroni due to a turnaround.

Income from operations for 2019 was SAR 2 billion, a decrease of SAR 0.3 billion, or 13%, compared to SAR 2.3 billion in 2018. The decrease is attributed to lower average selling prices in addition to decrease in sales volume.

OPERATING HIGHLIGHTS

SABIC innovation is at a premium. Our scientists continued to respond to current and anticipated market demands by improving existing formulations and developing new ones, not only to increase crop yields and quality but also to address other related challenges. In 2019, SABIC focused on producing the next generation of more environmentally conscious and economically sustainable fertilizers. SABIC has already developed and patented the world’s first biodegradable controlled release urea fertilizer, formulated to deliver synchronized nutrition at exactly the time and rate the growing crop needs it.

SABIC biodegradable polymer coated urea will have the thinnest coating in the market, allowing for maximum nutrient content per product unit with weight and offering superior wear and tear resistance. The spent coatings, unlike those of competitor products, are certified biodegradable polymers. Four patent families have been filed so far to protect this ground-breaking technology.

Post proof of concept conclusion, our team is currently engaged in multiple crop trials all over the world, to demonstrate the product value proposition.

Excellent progress has been achieved in developing the necessary design and project engineering to turn biodegradable controlled release urea fertilizer into a marketable, world-leading sustainability innovation. Another product developed by SABIC, Urea Calcium Sulphate (UCS), is the first of a kind that uses by-product calcium sulphate. UCS is a stable fertilizer, which delivers essential nutrients like nitrogen, calcium and sulfur to crops. Its key characteristic is that the release of the urea to soil is slowed, improving overall nitrogen efficiency compared to that of normal urea. The commercial trial of the product was successfully conducted at the Ibn Al-Baytar plant in 2019.

SABIC also developed Stabilized Nitrogen Urea (Seedcore3), a unique technology that will allow us to inject the urease inhibitors into the urea melt unlike other commercially available technologies. It has been scientifically proven to perform better than similar products.

We have also been successful in completing commercial trials at the Ibn Al-Baytar plant for the first water soluble NPK granules grade (Rasmadah) to address the growing demand for water soluble fertilizers. We continued our efforts to increase plant reliability, efficiency and production. In 2019, the SAFCO III ammonia plant’s reliability improvement project was completed.

Our first direct MAP/urea shipment to Brazil represented an important milestone in our push for an increased South American presence. Our phosphate presence in Iraq was up 35% year on year, while overall global phosphate sales grew 7%, marking the first full year of commercial production at SABIC JV Maraden Waled Al-Shamil Phosphate Company.

A new model ‘Bulk in Container’ offering targeted end-user sales with a premium proposition, helped increase sales from 13KMT to 65KMT. Phosphate sales grew well in the US and in Brazil, where a 44% increase further strengthened our presence in this key US South American market.

In our strategic partnership with the Saudi Ministry of Environment, Water and Agriculture, SABIC organized numerous activities including a field training day for farmers in Sajer, aiming to help drive improvements in farm management and optimize exploitation of SABIC products’ full potential. We also sponsored key Saudi dates and fruit festivals.

SABIC was the largest exhibiting company at the Sahara International Agricultural Exhibition in Egypt – the largest industrialized agricultural exhibition in the entire MEA region. In coordination with the Arab Fertilizer Association in Cairo, SABIC helped to conduct a training course for employees of the Saudi Ministry of Agriculture on modern methods of fertilization – a first in the Arab world.

SABIC joined the Riyadh and Eastern Chambers of Commerce in the first joint cooperation on field days in Dawadmi province and AlQair AlAloia.

Our field training schools continued to help raise crop productivity in Saudi Arabia. The training was extended to Oman for the first time, in cooperation with the Omani Ministry of Agriculture and the Arab Fertilizer Federation.

The SABIC-supported National Research and Development Center for Sustainable Agriculture (Estidamah), based in Riyadh, maintained its institutional collaboration with the agriculture sector through its applied research and training programs on innovative farming techniques. With 2,400 hours dedicated to training 150 people in 2019, the center helped spread knowledge among Saudi Arabia’s growers in sustainability-related fields such as integrated pest management, water and nutrient management, crop management and greenhouse climate control. For the years ahead, the center will continue to seek to provide practical solutions to public and private enterprises, to enhance farming efficiencies and effectiveness, and to help boost the national agriculture industry.

SABIC and SAFCO received the Industry Stewardship Champion gold medal at the International Fertilizer Association (IFA) Strategic Forum in Versailles, France. Industry Stewardship Champion recognizes companies that have participated in all IFA’s most recent benchmarks related to employee safety, environmental performance, energy efficiency and CO2 emissions.

LOOKING AHEAD

We will build our lead in biodegradable controlled release urea fertilizer, capitalizing fully on our first-mover advantage, and fast track improved methodologies for inhibitor treated urea products. We will leverage our core competencies to build our value-added portfolio of multi nutrient fertilizers such as N-S compound fertilizer, micronutrient treated urea, and other grades combining secondary nutrients with nitrogen. We will institute new reliability improvement initiatives to further reduce production interruptions and increase output without raising feedstock consumption. We also plan massive expansions in our TOU capacity by converting to non-UF (urea formaldehyde) additives, and to begin fully leveraging our existing joint ventures to bring new NPK/NPS (phosphate) products to market.

Following our share-purchase agreement with SAFCO in December 2019, we are focusing on boosting shareholding value by enhancing capabilities, making breakthrough technological advances, and exploring growth opportunities through SABIC’s wide reach across global markets.
METALS (HADEED)

Metals products are supplied under the SABIC brand through Hadeed, a fully owned manufacturing affiliate of the company. As a leader in the Gulf region for steel production and manufacturing, we produce high-quality metals and supply some of the world’s fastest growing economies. Hadeed is the biggest steel producer in the Arabian Gulf, manufacturing a range of Long and Flat products. With strong support from our talented employees, our objective within Hadeed is to manufacture and supply competitive and quality steel products and maintain best-in-class standards in Environment, Health, Safety, Security and Reliability, while sustaining maximum value for our stakeholders.

Hadeed’s key product offerings include Long Products, which typically consist of Rebar and Rods, while Flat Products consist of various types of rolled coils, which are produced based on order requirements. These products are used in various industries such as construction. Most of Hadeed sales are in Saudi Arabia.

FINANCIAL HIGHLIGHTS

Revenue in 2019 was SAR 10.79 billion, a decrease of SAR 0.03 billion, compared to SAR 10.82 billion in 2018. This was attributed to a decrease in sales volume by -2% compared to 2018, which is driven by steel demand that dropped as compared to 2018, combined with limited infrastructure spending. Prices of raw material on the other hand experienced a sharp increase mainly due to a force majeure incident at one of the largest global iron ore suppliers. Adding to these challenges, were prices for imported material and tariffs imposed by regional countries and paired with limited infrastructure spending.

To face these industry economic headwinds throughout the year, we focused on key strategic areas, and continued to enhance our capabilities to achieve loan, efficient and sustainable results. Hadeed’s strong economic fundamentals, strategic leadership, and manufacturing and human assets have supported us in moving ahead in 2019, and successfully surpassing over 8% of the target set by the transformation program for the year.

A key initiative in 2019 aimed at improving profit margins by gaining more business in the high quality, high value end of the market. In addition, Hadeed achieved remarkable improvement records by focusing on value-added products and cost optimization. We have also improved our industrial processes. In addition, we explored new markets with a wider range of products, consistent with the requirements of local and global markets. Our transformation program, first initiated in 2017, has resulted in a successful turnaround performance, with the aim to achieve a sustainable first quartile competitive performance and profitability.

In 2019, our key strategic focus to fulfill our transformation objectives was on:

- Upstream investment in iron ore mining for further cost optimization of our principal raw material.
- Cost efficiency program to optimize fixed costs and maintain organization effectiveness.
- Synergies with domestic governmental and investment agencies to contribute to Saudi Arabia’s localization drive.
- Synergies with internal manufacturing entities among SABIC corporate on common and shared interest projects consistent with our cost optimization program.
- Cooperation with local regulators to adopt fair market practices.

We conducted our annual analysis of environmental and safety performance, building on SABIC’s critical organizational behavior and Leadership Way strategy, which guides every leader to help our business, including bettering EHS5 performance. Besides environmental and safety performance, other key issues addressed this year included plant reliability and organizational optimization, and improvements in resource-utilization and product waste reduction.

We initiated a Utilization of Hydrogen Tail Gas project at Hadeed Direct Reduction plants to synergize with SABIC affiliates by using hydrogen-rich streams, which these affiliates produce through our direct reduction process. This added considerable value to the use of these streams.

Hadeed also developed a novel process for graphite carbon production from natural gas and enhancement of the steelmaking process using CO2 purging, giving us a competitive edge over competitors as regards to intellectual property and production cost.

Improvements continued to be made in supply chain this year, as Hadeed introduced a “truck saddle” redesign, eliminating human intervention, enhancing employee-safety while increasing handling process efficiency by up to 37%. The drive for efficiency extended to our dealings with third parties, with a new land transport contracting strategy launched in August expected to cut logistics costs by around 7–13%.

Global shortages in the availability of high-quality iron ore made it imperative to find new suppliers who could provide the quality we needed at prices that made sense. After significant explorative efforts launched in early 2016, alternative grades have now been introduced that both widened our feedstock options and reduced costs, with the negative impacts of lower quality on plant operations mitigated through modification of process parameters and adjustments of the iron ore feed.

In another successful development, we addressed the problem of cluster-formation of Direct Reduced Iron pellets during direct reduction processes. This occurrence has always been a critical concern as reduced gas penetration ability for iron ore pellets during the reduction process. Hadeed has now modified its coating conditions to cover the outer layer of the pellets and avoid sticking of pellets, thus enhancing productivity.

Looking Ahead

With the global economic outlook still uncertain, we expect the marketplace to continue presenting challenges for the steel industry in the near future. But we are committed to maintaining the momentum of our transformation program, and continue addressing those challenges by maintaining our efforts to bear down on costs, improve production efficiencies and productivity, and invest in the skills and capabilities of our people. Our materials will continue to equip architects and builders in Saudi Arabia with the high performance they need and gain ever-greater access to export markets and to the high value-add end of the marketplace for metals.
CORPORATE PERFORMANCE
At SABIC, we believe our people are our key enablers: driving performance, delivering growth, and building relationships rooted in trust and mutual benefit.

To become the preferred world leader in chemicals, SABIC aims to attract, build and develop high performing teams. SABIC’s Human Resources (HR) helps build a vibrant work environment worldwide: continuous learning, excellent career opportunities, and competitive rewards for performance.

**EMPLOYEE VALUE PROPOSITION REFRESH**

In 2019, we refreshed our Employee Value Proposition, to more accurately reflect the SABIC of today and the challenges of the journey ahead.

A Global Employee Survey with a participation level of around 19,000 employees saw an open and candid two-way dialogue: sharing ideas and perspectives, goals and ambitions, with a view to developing a greater common understanding between employees, workforce and leadership. Continuous learning has always been key to SABIC. We are committed to continually improving our knowledge, ideas and capabilities, helping all our stakeholders achieve their ambitions, and empowering them to change the world for the better.

The SABIC Academy offers competency-based learning across 12 career lines via both classroom and online teaching, with a wide range of courses accessible to every one of our 33,000+ employees around the world, including programs leading to recognized certification in disciplines like Sales, Marketing, Finance, Manufacturing and Supply Chain.

Our leadership development processes support our SABIC Leadership Way: four priorities – Talent Champion, Collaboration Partner, Innovation Pioneer and Excellence Driver – to help identify, nurture and develop skills, behaviors and mindsets that drive meaningful innovations, inter-functional collaboration, and cost reductions throughout the business.

**CONTINUOUS LEARNING**

Continuous learning has always been key to SABIC. We are committed to continually improving our knowledge, ideas and capabilities, helping all our stakeholders achieve their ambitions, and empowering them to change the world for the better.

The SABIC Academy offers competency-based learning across 12 career lines via both classroom and online teaching, with a wide range of courses accessible to every one of our 33,000+ employees around the world, including programs leading to recognized certification in disciplines like Sales, Marketing, Finance, Manufacturing and Supply Chain.

Our leadership development processes support our SABIC Leadership Way: four priorities – Talent Champion, Collaboration Partner, Innovation Pioneer and Excellence Driver – to help identify, nurture and develop skills, behaviors and mindsets that drive meaningful innovations, inter-functional collaboration, and cost reductions throughout the business.

**VISION 2030**

Since the 2016 launch of its Government Leadership Program, the SABIC Academy has delivered 11 sessions to more than 400 Saudi government officials – over 120 this year – developing key skills and mindsets, and enabling networking among business and government leaders.

In 2019, our annual Summer Innovation Program in Riyadh, Jubail and Yanbu emphasized three educational tracks – Manufacturing, Research & Development and Business – under the theme, “Our Youth: Vision and Aspiration.” Over 400 participants used innovative media such as virtual reality, artificial intelligence, gamification and fabrication in the program, which concluded with an exhibition in each region showcasing 69 projects linked to SABIC’s business portfolio.

The Saudi HR Think Tank, launched in 2018 with the Ministry of Civil Service, gained an Advisory Board, with HR leaders and influencers from SABIC and the government sector, along with a new online presence. SABIC also honored five winners of its Entrepreneurship Award – one of the programs of NUSANED™, a SABIC initiative to support local content and help Saudi entrepreneurs create and grow businesses in support of Vision 2030.

**STRATEGIC WORKFORCE PLANNING**

Strategic workforce planning is about having the right people in the right job at the right time – and at the right cost.

2018 saw SABIC adopt, adapt, develop and execute best practice methodology, with a five year plan identifying critical capabilities, and establishing an evidence-based decision making process to aid employee retention, talent identification and development, gap assessments, all integrated with our operational business planning cycle. In 2019, the plan was updated through running a number of “what if?” scenarios, assessing potential projects in areas like automation and artificial intelligence, as well as regional gap-closing strategies and migration paths, for their financial and workforce implications for business units and corporate functions.

Since the 2016 launch of its Government Leadership Program, the SABIC Academy has delivered 11 sessions to more than 400 Saudi government officials.
SUPPLY CHAIN

A continued focus on operational excellence and commitment to digital transformation helped deliver another year of strong performance for SABIC Global Supply Chain (GSC).

2019 produced another set of impressive performance figures: around 32 million tons of product delivered to almost 11,500 customers in over 140 countries; more than 18,000 stock keeping units flowing through around 200 distribution centers; and around 500 logistics service providers around the world helping process almost half a million outbound deliveries.

**STRATEGIC GOVERNANCE**

2019 saw implementation of the Global Supply Chain Excellence Framework. The Framework consists of nine elements covering all aspects of the supply chain, from strategic governance to EHSS, from operational excellence to customer experience.

Digitalization is a key element, with initiatives aiming to exploit the full potential of the blockchain, robotic process automation and enhanced customer connectivity currently being implemented, assessed, fine-tuned and rolled out throughout all GSC functions and regions.

**CUSTOMER EXPERIENCE**

SABIC GSC is always striving to enhance the customer experience by expanding our scope to address our customers’ needs globally, embracing emerging technologies, and enriching our engagement with partners. Highlights from the last 12 months include:

- **Trade solution award** – SABIC Solids Supply Chain in MEAF bagged 243 nominations from all over the world to win the coveted 2019 Adam Smith award for best trade solution, demonstrating best practice, innovation, collaboration, creativity, teamwork and determination. The winning solution, shipping documents to banks electronically, cut lead-times by up to 40%, as well as saving costs throughout the value chain.
- **Direct delivery to Vietnam** – SABIC Liquid Supply Chain overcame major infrastructural challenges to help maximize integrated margins by optimizing factors such as fixed usages, production rates, cracker operating conditions, product allocations and throughput rates. Value chain planning helps GSC adapt to a complex and constantly changing environment, optimizing the entire value chain to continually improve cost efficiency, service delivery and ultimately profitability.

**SUSTAINABLE SUPPLY CHAIN**

Sustainable Supply Chain is one of our key focus areas to help drive the conservation of natural resources and reduce carbon emissions. Supply chain digitization is creating further visibility in our performance that has led to a number of newly launched projects this year improving our sustainability performance. They include:

- **E-vehicles** – GSC this year began trialing electrical delivery vehicles with one of its China affiliates, with raw materials delivered from the manufacturer to the on-site warehouse at the SABIC joint venture plant. GSC anticipates ever-increasing use of e-vehicles over the next 5–10 years, and has assigned them a key role in its long-term land transportation strategy.
- **Environmentally friendly shipping** – GSC is working with shipping lines to explore the potential of alternative fuels, with a view to minimizing the cost impact of compliance with the new, more demanding 2020 International Maritime Organization regulations.
- **Go-Green project** – as part of an ongoing America polymers import optimization project in the US, GSC ceased printing in favor of electronic transmission for key documents such as Certificate of Origin.

**PLANNING CAPABILITY**

As part of the new Framework, GSC launched a new advanced modeling and optimization application at one of our Yanbu affiliates in Saudi Arabia. Related initiatives are in progress at various other affiliates. Such initiatives bring together GSC and the affiliates to help enable a seamless supply chain from operational excellence to customer experience.

Embracing digitalization will help enable a seamless supply chain operation.

**NETWORK MODELING**

GSC is steadily enhancing its network management capability, implementing a range of network modeling tools to optimize its vast global distribution network, with modeling competencies developed in-house helping ensure continuity. Modeling assesses the efficiency of over 150 locations and 20,000 routes worldwide, and aids continual improvement of SABIC’s supply chain models, helping improve service to customers, prepare for growth, optimize working capital, cut cost out of the supply chain and enhance sustainability.

Network modeling is set to transform the entire global supply chain; early benefits are particularly notable in:

- **Middle East/Africa** – where the SABIC team is working with Saudi Rail company to investigate the potential for greater use of rail to transport SABIC goods, to help streamline container collection, reduce road transport, and improve customer service while reducing environmental impact. Recent improvements at Jubail’s Petrochemicals Quay 2 are helping improve (peak period) loading efficiency and delivery reliability to customers served through SABIC’s Number 1 global export gateway.
- **Europe** – where greater use of our Rotterdam hub, The Netherlands, is improving the service provided to customers for materials coming from Cartagena, Spain, helping reduce lead-times and operating cost, and cutting road use by 60%, delivering significant sustainability benefits.
- **America** – where enhancements to finished goods warehouses have improved customer service without adversely impacting cost, and reduced overall transport mileage by 55%.

**LOOKING AHEAD**

GSC will continue enabling growth for SABIC Business Units while delivering enhanced and differentiated services to our customers. Through digital integration and collaboration, GSC will proactively exploit disruptive technologies, respond swiftly and effectively to supply chain network challenges, and seize on emerging opportunities.
In 2019, SABIC Corporate Technology and Innovation (T&I) comprised 1,533 employees working on 597 research projects – across short, medium and long-term horizons – at 21 research centers around the world.

This year we met our ambitious targets in technology delivery, strengthening our pipeline, and protecting our technology, with issued patents and patent applications rising to 12,540. In addition, we are actively driving increased market-in-focus on our pipeline, value delivery from innovation, and collaborations across the SBUs, T&I, and Manufacturing to increase impact and accelerate time-to-market. Over the year, SABIC T&I continued to focus on enhancing its portfolio, executing projects, delivering on multiple fronts including process and product innovation, application development, and technology licensing and expanding technology-venturing initiatives to bring more disruptive innovation into the portfolio. Looking ahead, we will maintain this focus, as well as looking to acquire complimentary technologies from third parties. T&I was a key contributor to SABIC’s success in 2019, and we anticipate T&I playing a lead role in SABIC’s ambition for sustainable growth in the years ahead.

PARTNERSHIPS FOR PROGRESS
In 2019, we continued to work with peers, customers, the broader value chain, and other external partners to develop new processes and products that help address emerging needs, from improved efficiency to performance enhancements to sustainability. Some innovations this year include:

HELPING DEVELOP THE NEW DEFENDER
Automakers continue to seek lighter materials with no compromise in high strength and performance, for their fuel economy and environmental benefits. One such manufacturer is Land Rover, who worked with SABIC to develop their new model of the iconic Defender. This landmark vehicle now incorporates our thermoplastics easily, more reliably, and efficiently, potentially making possible significant time and cost savings.

LIGHTWEIGHT SOLUTIONS FOR BMW
BMW won a second-place innovation award at the Society of Plastics Engineers Central Europe Automotive Awards with a hybrid stress car beam and glove box, co-developed with SABIC, whose STAMAX™ long glass fiber reinforced material fabrication delivers high stiffness and impact resistance while reducing weight.

FORMULATIONS FOR THE FUTURE
New and improved formulations open up a world of new possibilities for SABIC and our customers.

NEW HIGH HEAT RESIN FOR AUTOS
Today’s electric vehicle manufacturers are looking to cut weight without compromising crash safety performance. Plastic-metal hybrids can combine plastic’s lightness and stiffness with the strength of metal, but the plastics need to survive high priming/ painting temperatures. SABIC this year launched XENOY™ HTX resin – a resilient lightweight polymer – and is currently working with automakers on structural components that can fully exploit its capabilities.

BETTER BATTERIES FOR A BETTER TOMORROW
The challenges of batteries for electric and next-generation vehicles include weight reduction, improved energy density and durability, and tough regulations. SABIC this year released a new set of flame retardant solutions for battery parts including housings, covers, bottom trays, modules, cell carriers and end plates, offering up to 30–50% weight savings over metals, for significant fuel economy and environmental benefits.

NEW ETP RESIN DELIVERS SUSTAINABILITY ADVANTAGES
New CYCOLAC™ and CYCLOLUX™ ABS resins, produced globally for many applications across a wide range of industries, have a new sustainable formulation, which improves product quality while reducing reaction cycle times around seven percent, cutting energy consumption and up to 100 tons per year equivalent of hazardous waste production.

INDUSTRY-FIRST FOR PC-BASED CERTIFIED RENEWABLE FEEDSTOCK
SABIC officially announced the launch of FLEXAM™ polycarbonate (PC) based on certified renewable feedstock – an industry first – at the K2019 trade show in Dusseldorf, Germany, extending SABIC’s strategic sustainability pathway beyond polyolefins, with carbon footprint reduced by up to 50% compared with fossil-based PC production.

XENOY™ HTX RESIN LAUNCH EXPANDS ETP OFFERINGS
SABIC’s new XENOY™ HTX’s high heat cycles and excellent impact and flow characteristics make it ideal for complex geometries and a wide range of temperatures, with moisture-resistance that suits it to applications from automotive to appliances, architectural structures to marine.

IMPROVING PRODUCTION TECHNOLOGY
Better production technology makes for fewer shutdowns along with improvements to productivity and environmental performance.

NEW ABS TECHNOLOGY CENTER
October saw the opening of the new ABS Technology Center at the Mount Vernon, Indiana site, enabling development and cost effective production of new chemistries, sustainable processes and diversified product portfolios for US and Saudi customers.

GLOBAL CRACKER TECHNOLOGY
Global cracker technology maximized feedstock utilization by improving olefin yields at four olefins plants, and yields through optimized hydrogenation reactors at another. Improved furnace firebox performance enabled full feedstock consumption at one Saudi cracker. Sustainability-driven energy reduction initiatives brought significant fuel savings, while a fouling mitigation program saw significant benefits including shutdown-prevention.

OLEOCHIMICALS TECHNOLOGY
Pharma grade polyethylene glycol and glycerin meet key elements of the United States and European pharmacopoeia and Food Chemical Codex standards.

OPTIMIZATION BRINGS BENEFITS
– Solutions implemented by a multi-disciplinary team reduced shutdowns at the linear alpha olefins plant from three to one in a year, delivering 100% on-stream production and a 3,300 ton year on year production increase, along with improvements to both product quality and plant carbon footprint.
– Successful implementation of plant optimization measures brought a 2,300 ton increase in 2-ethylhexanol production while reducing propylene feedstock consumption by 625 tons.
– A quick-wins exercise at the Ibn Zahr MTBE plant increased production by 11,500 tuns up to September 2019.

– A methanol recovery from waste stream initiative at Arrazi reduced environmental impact with improved performance for greenhouse gases and energy and water intensity, while production to September was up 5,700 tons.

– An ongoing effort to maximize ethylene oxide catalyst selectivity in glycol plants improved performance resulting in less consumption of feedstock (ethylene) and reduced CO2 emission.

TECHNOLOGY LICENSING
Technology Licensing conducted robust technology assessments for several technologies with SABIC global growth initiatives potential. The key Sustainability Footprint assessment helps ensure compliance with SEEC (Saudi Energy Efficiency Center) targets, and several studies have led to significant sustainability improvements to SABIC polyolefin technology process design packages.
Further studies in collaboration with affiliates helped maximize asset productivity, enhance efficiency and reduce energy intensity, delivering significant environmental benefits.

TECHNOLOGY VENTURING
The company strengthened its Technology Ventures footprint in Europe, North America and China in close alignment with its strategic technology goals. The investment portfolio currently includes ten active companies, two technology licenses and four funds.

FUTURE SCIENTISTS
People are central to developing our innovative ideas and culture, and their support is helping to make an impact on our bottom line. We lay emphasis on building the right competency across our global innovation centers toward being a global synergized organization. Many of our future scientists complete Masters and/or PhDs at elite universities in fields such as catalysis, engineering, and differentiated polymers/materials. We complement their advanced training with our early career development and on-the-job-learning programs at our manufacturing affiliates, as part of our 2025 competency roadmap.
MANUFACTURING

Manufacturing remains on course in its strategic pursuit of SABIC’s targets. Improved risk discovery, calculated performance monitoring and a clear focus on prioritized objectives are key to SABIC performance.

Our Strategy Execution platform, incorporating enhanced alignment between Manufacturing and sites’ priorities and improved engagement on strategy requirements, continues to make significant progress toward meeting defined objectives.

A challenging external environment presented major challenges over the course of 2019, with, for example, an increase in domestic feedstock curtailment. Despite such pressures, production performance was down just 3% year on year.

RELIABILITY AND ASSET LIFE IMPROVEMENTS

In our ongoing pursuit of best quartile performance for all assets, the year saw a number of notable achievements. Increased production at Petrokemya, a new propane recycling process at Sharq, on-schedule commissioning of styrene butadiene rubber at Kenya, and completion of reliability improvement projects at SAFCO III (with a new 1,800 MTPD design capacity) and SAFCO IV assets are good examples of our pursuit of best quartile performance.

Meanwhile, the planned shutdown at Ibn Zahr (MTBE 2 and Polypropylene 3 units) was kept to a minimum, while taking advantage of some unplanned outages to undertake targeted maintenance that should significantly reduce future planned shutdowns at Petrokemya. Strategic feedstock management efforts have also paid off in providing a buffer against external pressures, with maximized methane, propane and naphtha use, generating above plan production for selected key focus products.

The Asset Integrity and Reliability (AIR) program, implemented at 21 operating sites this year, concluded its first cycle, launched in 2017. The plan is to implement the AIR program in a three-year cycle. The Asset Life Assessment (ALA) program, focusing on aging or obsolescence issues, is also in operation, looking to introduce operational changes, interventions and replacements to mitigate problems and extend asset life.

AIR, along with the Reliability-In-Design concept embedded in project gating process and Advanced Process Control Applications, are helping deliver steady progress against our reliability and asset lifetime targets.

ENERGY OPTIMIZATION

Manufacturing continues its drive for optimum energy efficiency in support of SABIC’s sustainability objectives.

Opportunity assessments identifying and evaluating potential conservation measures to reduce our overall footprint were carried out at four major sites in 2019. Such assessments also play an integral part in the evaluation process for any proposed mega projects, to ensure optimal sustainability performance.

The Site Energy Optimizers Program, which began in 2018, continued to deliver positive results, with comprehensive deployment at eight sites during 2019, both producing immediate energy savings from quick wins and enabling improved energy system operating strategies.

To support capability building and develop the human capital and internal talent key to enhancing our sustainability performance, our Certified Energy Expert training program—a comprehensive, interactive course focusing on key competencies—this year qualified 40 engineers from SABIC affiliates. In addition, 150 operators and technicians also received sustainability basics training in 2019.

SABIC OPERATIONS MANAGEMENT SYSTEM (OMS)

In 2018, Manufacturing launched the Operations Management Systems (OMS) initiative. Building on our legacy Safety, Health and Environment Management System, OMS integrates EHSS and Work Process Management systems in one framework to safely operate and optimize performance of SABIC assets. Key success factors were identified in the sites deployment phase. The main theme of the OMS is to ensure quality procedures and efficient embedding of changes at organizational levels, from management to frontlines.

The focus in 2019 was on developing site-specific Operating Management Systems, to reduce risk and increase productivity and efficiencies.

Workforce Development

Growth opportunities for engineers saw programs like SABIC Engineers Early Development, Technical Ladder, and Jump Start for Leaders. Peer review panels with input from relevant stakeholders supported a focus on change management for the forefront, with a unique immersive, interactive environment: OMS Connect—The Frontline Experience. SABIC this year also graduated its first batch of Frontline Supervisors.
Environment, Health, Safety and Security (EHSS) continues to be a core value at SABIC, which remains committed to achieving industry-leading performance.

The global EHSS organization serves as a center of excellence supporting all manufacturing operations, business units and corporate functions in continually improving our EHSS performance at sites around the world.

This year we raised EHSS competencies, expanded forums and communication channels to improve global information-sharing, and continued working towards excellence in people development, digital transformation, and risk and operations management.

MANAGEMENT SYSTEMS

- SAFETY, HEALTH & ENVIRONMENT MANAGEMENT (SHEM) STANDARDS AUDITS
  The SHAH framework concept was developed and implemented, supplementing auditing as the primary means of assessing sites’ SHEM performance and progress.
  This new risk-based assessment approach was successfully implemented at eight sites, and will be used going forward to assess performance at our facilities.

EHSS INFORMATION ENABLEMENT (E-SHEM)

- E-SHEM improves risk identification and management by making key EHSS information richer and more accessible through better aggregation and distribution via efficient web-based platforms and communications.
  Manufacturing this year introduced the electronic EHSS Risk Register, EHSS Audit Management and EHSS Calendar in Saudi Arabia to help register risk, capture findings, and track recommendations and mitigation actions.

GLOBAL KEY PERFORMANCE INDICATORS (KPIs)

- Quarterly reviews to monitor KPI awareness, data quality, trends, and alignment on actions, to aid continuous improvement.
- Feedback workshops with regional and affiliate evaluators to evaluate interactions, data quality and trends, with a view to refining or introducing new KPIs.

RESPONSIBLE CARE®

- Responsible Care® embodies the global chemical industry’s commitment to continual improvement in EHSS.
  SABIC this year updated its Responsible Care® certification to RC14001:2015, as verified through third party audits, with no major non-conformances identified over the past five years. This standard is itself expected to be replaced by ISO 45001:2019 saw a 10% improvement in correct actions implementation.

HEALTH, SAFETY & ENVIRONMENT

- We strengthened our health, safety and environmental competency program with specific development and training pathways for operations, non-operations and specialists.

  Our environmental initiatives have this year focused on digitization, competency and risk discovery tools to help our sites detect and analyze abnormal environmental control performance, and on updating and improving our training programs.

PROCESS RISK MANAGEMENT

- Our process risk management (PRM) this year continued to focus on high consequence/low likelihood risks, and we enhanced our performance in:
  - Process safety knowledge and competency – with programs bringing training and qualification to ever-increasing numbers of the workforce.
  - Risk discovery and management – using proven methodologies like facility sitting, hazard and operability studies, fault tree analysis, transient operations, hazard review analysis and layer of protection analysis to aid integrated prevention, discovery and management.
  - Process safety metrics and SAFER (SABIC Assurance Program for EHSS Risks) assessments – to continue to monitor risk levels and further guide safer facility operation.

PRODUCT STEWARDSHIP

- Core programs were further built on key initiatives to develop and deploy product stewardship knowledge and competency, enhance product stewardship related communications, and improve risk discovery and management processes. This year we:
  - Began building a new product stewardship certification program, and completed a competency guidance development.
  - Identified 10 priority high risk chemicals to continue our value chain communication outreach to promote product safety management and information exchange.
  - Completed additional risk characterizations to ensure Responsible Care® compliance by 2020 for SABIC’s top 50 high priority chemicals.
  - Implemented new monitoring processes for emerging regulatory environments such as Russia, Vietnam, Brazil, Thailand, Taiwan and Turkey.
  - Rolled out new product stewardship SHEM OIMS 3114 training materials in multiple formats.

SABIC this year completed implementation of its four-tired process safety metrics of leading and lagging indicators, based on American Petroleum Institute – Recommended Practice 754 (API RP 754).

PREPAREDNESS AND SCENARIO MANAGEMENT

EMERGENCY PREPAREDNESS

- Pre Incident Planning (PIP) aims to improve our incident responsiveness.
  80 scenarios devised by independent experts were undertaken this year; extension to all global sites scheduled by end-2020.

SECURITY MANAGEMENT

- This year we launched a project to ensure our Saudi Arabian affiliates’ full compliance with new directives from the Saudi High Commission for Industrial Security; implemented a digital system for managing and documenting security programs; and continued to implement a competency-based development program equipping frontline site security officers to detect and prevent criminality.
  - In the United States, regulatory security inspections by the US Coast Guard and the Department of Homeland Security at four SABIC sites revealed no deficiencies. We also piloted a violence prevention project, and developed a new risk assessment process based on the American Petroleum Industry’s methodology, with assessments at 15 sites.

CRISIS MANAGEMENT

- Crisis Management Leadership workshops were held for senior leaders in all regions. Improved crisis management plans and readiness exercises based on a variety of scenarios from natural disasters to IT outages, manufacturing mishaps and supply chain incidents strengthened our capabilities. We continued to develop and pilot new tools to improve communications during crisis incident management.

2019 – EHSS IN NUMBERS

- Engagement and Support
  - 24 EHSS networks were active across all regions.
  - Eight security risk assessments were conducted for sites across the globe.
  - Four incident learning sessions were conducted in the Americas region.
  - Over 10,000 responses to customers were made for product stewardship inquiries.
  - Over 84,000 safety data sheets were published.

- Capability Building
  - 589 security guards received firearms training.
  - 206 engineers and other professionals were trained on Process Hazard Analysis leader qualification, facility siting, pre-incident planning, and Layer of Protection Analysis.
  - 161 engineers graduated from process safety fundamentals training.
  - 115 safety and environmental professionals were trained for NBOSI (National Examination Board in Occupational Safety and Health) certification.
  - 95 instructors were trained for new unified safe work permit and LOTO (lockout/tagout) across the regions.
  - 10 crisis management awareness sessions were held for 140 leaders and key stakeholders.
SUSTAINABILITY

2019 saw the launch of SABIC’s Sustainability Development Goal Roadmap, aligned to the UN’s Sustainable Development Goals (SDGs), outlining ambitious targets relating to resource efficiency, the circular economy, food security, sustainable infrastructure, and preservation of the environment.

The Roadmap, integral to SABIC’s 2025 strategy and underpinning its sustainability program, encompasses the entire value chain from sustainable feedstock sourcing to energy efficiency, from sustainable product and process innovation to advocacy and multi-stakeholder collaboration. SABIC this year received recognition as a leader in sustainability reporting for the second consecutive year by the World Business Council for Sustainable Development, whose Reporting Matters survey of 159 leading global companies commended the 2017 ‘Making a Difference’ report for its strategic approach, and circular plastics, while reducing impacts through waste and flaring.

A CIRCULAR MILESTONE
This year brought a major milestone in SABIC’s transformation project to turn mixed plastic waste into certified circular polypropylene. Launched in January, this key “market foundation stage” example saw pyrolysis oil feedstock produced by Plastic Energy Ltd from mixed plastic waste introduced at SABIC’s Gelsen site in the Netherlands. SABIC also began production and commercialization of certified circular polyethylene, underpinning its sustainability program, The Roadmap, integral to SABIC’s 2025 strategy and underpinning its sustainability program, encompassing the entire value chain from sustainable feedstock sourcing to energy efficiency, from sustainable product and process innovation to advocacy and multi-stakeholder collaboration. SABIC this year received recognition as a leader in sustainability reporting for the second consecutive year by the World Business Council for Sustainable Development, whose Reporting Matters survey of 159 leading global companies commended the 2017 ‘Making a Difference’ report for its strategic approach, and corporate strategy alignment. In June, SABIC also received recognition from the American Chemical Society, winning its first ever sustainability leadership award in Environmental Protection and Circularity for its certified polymer initiative. We were also among the global chemical industry’s first to achieve the British Standards Institute’s PAS 2060 carbon neutrality standard. Besides, SABIC’s global headquarters was certified as a carbon-neutral site in 2019.

MATERIALLY ASSESSMENT
SABIC has undertaken a comprehensive refresh of its 2013 materiality process, using hard data to build on 2013’s qualitative approach and set new five-year priorities.

Six core materiality areas and nine for developing step-change targets were defined, with materiality focused on priority areas, and supply chain, human capital, and product stewardship redefined and re-evaluated as continuous improvement, party reflecting maturing programs that now meet business needs. New, step-change key performance indicators now target opportunities in areas such as renewable energy and circular plastics, while reducing impacts through waste and flaring.

SUSTAINABLE SOLUTIONS
This year, SABIC launched numerous groundbreaking projects to turn mixed plastic waste into certified circular polypropylene. Launched in January, this key “market foundation stage” example saw pyrolysis oil feedstock produced by Plastic Energy Ltd from mixed plastic waste introduced at SABIC’s Gelsen site in the Netherlands. SABIC also began production and commercialization of certified circular polyethylene, underpinning its sustainability program, The Roadmap, integral to SABIC’s 2025 strategy and underpinning its sustainability program, encompassing the entire value chain from sustainable feedstock sourcing to energy efficiency, from sustainable product and process innovation to advocacy and multi-stakeholder collaboration. SABIC this year received recognition as a leader in sustainability reporting for the second consecutive year by the World Business Council for Sustainable Development, whose Reporting Matters survey of 159 leading global companies commended the 2017 ‘Making a Difference’ report for its strategic approach, and corporate strategy alignment. In June, SABIC also received recognition from the American Chemical Society, winning its first ever sustainability leadership award in Environmental Protection and Circularity for its certified polymer initiative. We were also among the global chemical industry’s first to achieve the British Standards Institute’s PAS 2060 carbon neutrality standard. Besides, SABIC’s global headquarters was certified as a carbon-neutral site in 2019.

AUTOMOTIVE & TRANSPORTATION
With vehicle weight reduction lowering CO2 emissions and improving fuel economy or electric vehicle range, automakers continue to seek lighter construction materials that will not compromise high strength and performance.

PACKAGING
Plastic packaging offers many benefits, from physical protection to extended shelf life. It can also play a crucial role in cutting waste in the global food supply, so long as it complies with stringent regulations on consumer safety and the environment. SABIC having committed to make all its packaging recyclable or refillable by 2021, it is the forefront of developing greener solutions through scientific innovation and strategic collaborations.

CONSUMER GOODS & APPLIANCES
Plastics play an ever-increasing role in innumerable products which have become staples in the daily life of millions all over the world. Manufacturers seek materials that will enable them to create products that are strong, lightweight, and durable, with excellent functionality and performance. Many add sustainability to that list, along with design and aesthetic flexibility.

SABIC’s decades of experience deliver, in products like Trucircle® and other solutions, as seen in a raft of products like...
SABIC has a long established reputation for doing not only what is good for its business, its people and multiple other stakeholders, but also investing in the communities where we operate, creating social, environmental and economic value.

The company’s Corporate Social Responsibility (CSR) efforts focus on four strategic priority areas: Science & Technology Education, Environmental Protection, Health & Wellness, and Water & Sustainable Agriculture – areas which contribute to 10 of the UN’s Sustainable Development Goals – along with a commitment to community giving, providing assistance to people who need it most. Wherever we operate, we look to develop long-term mutually beneficial partnerships with local communities, with a sustainable approach that delivers lasting value, and innovative programs to meet community needs.

In 2019, SABIC invested in several impactful CSR programs, totalling US$15.6 million, which have enhanced our brand and turned our principles into action. We delivered seven global initiatives including 185 global programs in 103 cities and 22 countries. These programs engaged 2,531 SABIC volunteers who dedicated 10,874 volunteer hours in 22 countries. These programs engaged 2,531 SABIC volunteers who dedicated 10,874 volunteer hours in 22 countries. These programs engaged 2,531 SABIC volunteers who dedicated 10,874 volunteer hours in 22 countries. These programs engaged 2,531 SABIC volunteers who dedicated 10,874 volunteer hours in 22 countries. These programs engaged 2,531 SABIC volunteers who dedicated 10,874 volunteer hours in 22 countries.

SCIENCE & TECHNOLOGY EDUCATION
Ensuring quality education for all and promoting lifelong learning is a prime focus for SABIC. Our goal is to foster innovation, particularly through quality science and technical education, as evident through our 45 educational programs and three educational initiatives.

SABIC launched the Global Initiative for Education & Innovation in partnership with Junior Achievement and INJAZ (a part of JA Worldwide) which reached 94,442 students and 1,678 schools in 10 countries. Among the initiative’s programs are Connected with Tomorrow which prepares students for professional life, and Lights of Our Future which exposes students to urban sustainable development from an economic perspective, and encourages students to use critical thinking by applying the knowledge they acquired to create innovative solutions.

SABIC continued its Global Back-To-School Initiative in 2019, reaching 136,983 beneficiaries across 12 countries. It was tailor-made to suit each location: backpack programs in Argentina, educational programs in science technology in the USA, school renovation programs in India, and the Chemical Innovation Challenge in China. Our support for Mawhiba helped the Saudi team prepare for the coming International Chemistry Olympiad and the International Science and Engineering Fair.

SABIC Global Science Caravan toured the United Arab Emirates benefitting more than 2,000 students, continuing our previous year’s efforts in Saudi Arabia that benefitted over 70,000 students, offering programs in technology, chemistry, space science, and mathematics.

ENVIROMENTAL PROTECTION
As the circular economy accelerates its progress from visionary rallying cry to mainstream economic driver, SABIC maintains and redoubles its efforts to help safeguard the planet for future generations. SABIC launched its Global Waste-Free Environment Initiative covering 44 programs across 16 countries that aimed to sustain our oceans and marine life, besides tackling climate change and its impact. Environmental awareness is a key component of our strategy. In China, SABIC held an environmental protection themed fair with waste-sorting workshops. In the UK, SABIC volunteers visited schools to emphasize the importance of reducing, reusing and recycling.

World Clean-Up Day was observed in several countries. In Mexico, our employees focused on cleaning a waterway that supplies water to the Altamira and Tampico populations. Over 150 children were engaged in clean-up activities in the Netherlands. In Brazil, 77 SABIC volunteers collected 200kg of garbage from streets near the Campinas site. Beach clean-up activities were also held in various locations. Planting trees was another popular activity around the world. SABIC marked Arbor Day in Argentina where 18 employees participated in a tree-planting drive, and in Singapore employees planted four trees each.

HEALTH & WELLNESS
Our Global Health Initiative, including 23 programs across eight countries benefitting 110,016 people this year, was tailored to SABIC’s concern for the health and wellbeing of people in the communities in which we work, and society at large.

SABIC aims to motivate enterprises to initiate services that improve mental health and quality of life. In pursuit of this goal, SABIC signed a construction agreement for a specialist hospital in Riyadh for mental health and drug addiction treatment. In addition, SABIC honored winners of its National Mental Health Promotion Award where companies were recognized for helping change public perception towards mental health.

Meanwhile in the US, we organized a Race Against Violence fundraising event to assist those who have been impacted by domestic violence through counseling and shelter. Other health-related programs include Ajawd Underprivileged Home Care to rehabilitate patients and help them become self-sufficient, and a medical insurance program for orphans in Saudi Arabia.

In India, SABIC’s They See, They Learn program is in its fifth year working together with local government and NGO partners to raise awareness of eye-care, bringing screening, detection and correction services to those who need them, with over 100,000 children being screened. We also supported the SABIC Eston Nab Challenge in the UK, with SABIC employees joining over 200 runners for the challenging 10km hill race.

WATER & SUSTAINABLE AGRICULTURE
SABIC believes that managing water sources and sanitation goes hand in hand with ensuring better food and energy production. We are working to help end hunger, achieve food security, and improve nutrition by promoting and supporting sustainable agriculture.

As part of an initiative to help disseminate knowledge in effective farming practices – beginning with two earlier phases of technical training and agricultural caravans – 2019 marked the next phase of this goal through three SABIC Agricultural Field Schools covering Al-Madinah and Al-Ula in Saudi Arabia. The collaborative program provides a forum for sharing experience between farmers and scientific research bodies.

SABIC has also been supporting Saudi Arabia’s dates industry by participating in the Buraidah and Unaisah dates festivals, and Ayah Forum, highlighting our recognition of the importance of dates as a strategic national crop that also brings health benefits.

COMMUNITY GIVING
SABIC generates assistance for communities through economic stimulation resulting from our business activities, volunteerism and community programs. This year our Global Social Initiative totaled 65 engagements, and covered 17 countries.

Our Social Initiative targets the most vulnerable members of society. For example, volunteers from Argentina distributed 1,000 blankets to homeless people during the cold season. Impoverished children were provided warm school uniforms in South Africa. SABIC Korea employees came together to give back to the less fortunate with a Sharing Love Bread event in Seoul. While in Singapore, employees volunteered to “grant” the wishes of 63 beneficiaries from the Children’s Wishing Well.

We designed a play engaging adolescents in Brazil, stressing on the importance of empathy and human feelings. In Germany, employees demonstrated the importance of our arms and hands in an interactive presentation, serving as a reminder to be grateful for what we have.
FUTURE PLANS AND INVESTMENT

SABIC continued its committed efforts throughout 2019 to achieve its strategy, focusing primarily on accelerating growth, transformation initiatives, expanding its product portfolio, and developing innovative technologies.

DRIVING GROWTH
Both organic and inorganic, SABIC is working to build an asset footprint in the US to capitalize on shale gas opportunities, to build its presence in Asia and Europe, and to leverage its strength in Saudi Arabia for growth and Vision 2030. It plans to leverage and reinforce its local infrastructure and capabilities in support of its growth ambitions in China.

To maintain our growth momentum, we are further strengthening our relationships with our customers through our operations in 50 countries. We have established an extensive network of regional offices and operational centers throughout the Americas, Europe, the Middle East, Africa and Asia to support customer needs. We have a strong presence in key regions where demand is strong, with proximity to future growth markets as well. With our strategic geographic position and market-driven focus, we are well positioned to support our customers to grow their business with our differentiated offerings and innovative solutions.

Based on our approach of evaluating various investment opportunities that contribute to achieving our objectives and strategic plans, we do not see it feasible to establish a joint venture with South China for growth and Vision 2030. It plans to leverage and reinforce its local infrastructure and capabilities in support of its growth ambitions in China.

IMPROVING BUSINESS PORTFOLIO:
SABIC’s business plans for Specialties reflect its strategic importance. We plan to move it toward a multiregional business. Organically, the business will continue to focus on new opportunities in fast-growing and disruptive end-markets.

In a challenging competitive environment, SABIC Europe engages constantly in making business improvements, working closely with major OEMs and specifiers to better exploit technology and drive innovation, in compliance with stringent regulations and sustainability targets. We are playing a leading role in addressing the challenges of climate change, and have developed circular solutions with chemically recycled mixed plastic waste.

In 2019, we signed a share-purchase agreement with SAFCO, under which we will acquire the newly formed SABIC Agri-Nutrients Investment Company in exchange for shares, thus increasing our shareholding in SAFCO to 50.1%. Completion of the transaction is subject to regulatory approvals and SAFCO’s shareholders’ approval at its extraordinary general assembly.

In 2019, we signed a share-purchase agreement with SAFCO, under which we will acquire the newly formed SABIC Agri-Nutrients Investment Company in exchange for shares, thus increasing our shareholding in SAFCO to 50.1%. Completion of the transaction is subject to regulatory approvals and SAFCO’s shareholders’ approval at its extraordinary general assembly.

LEVERAGING INNOVATION
Innovation is key to maintain a competitive edge, achieve growth and drive success. We work closely with each business unit and operating function to improve existing processes and products as well as developing new ones, often working closely with our customers to do so.

In addition, as part of our research efforts, we collaborate with other companies, universities and international research centers. This usually involves a joint initiation, funding, supervision and completion of the research, followed by a sharing of intellectual property rights. We are currently working with over 350 partners across the globe and major partnerships are in place in the US, the Netherlands, China, Saudi Arabia and India.

ENERGY-EFFICIENT MANUFACTURING
Our manufacturing affiliates in Saudi Arabia are fully committed to complying with the first cycle targets set by the Saudi Energy Efficiency Program (SEEIP). Over the last five years, they have taken several initiatives to meet these targets, which will be measured by the SEEIP Audit Committee early 2020.

Despite several challenges and difficulties, our affiliates successfully reduced approximately 80% of the overall gap from targets based on the latest 2018 performance report issued by Saudi Energy Efficiency Center (SEEC), which is driving the program. We have so far completed more than 170 initiatives and projects with a total investment of SAR 4.6 billion.

We have also invested in building our competencies and capabilities by certifying more than 100 engineers through our certified energy expert courses, besides providing awareness sessions to more than 250 frontline staff. As part of the capability building, we have developed smart enablers such as Advanced Simulation tools.

Some of the challenges faced by the affiliates were the continued use of some outdated assets at the plants as well as old technologies that required upgrading to comply with SEEIP targets. This required huge investments and game-changing technologies that were unattractive from the business perspective.

However, after careful evaluation, the affiliates now have more than six new ongoing mega projects with the potential investment of SAR 3.2 billion, besides the already-spent investment.

The affiliates are also considering similar initiatives to comply with future targets, including investing in breakthrough technology, renewable energy, integrated cogeneration, digitalization, etc.

SABIC is continuing to interact closely with SEEC on potential credits for their consideration toward meeting the first cycle target. If we fall short of the target, we will explore solutions with SEEC to mitigate any possible consequences.
**FUTURE PLANS AND INVESTMENT CONTINUED**

**INVESTMENT**
SABIC continued to develop and expand its businesses under its ambitious long-term strategy. This includes a number of expansion and development projects, as well as signing of a number of strategic agreements. The projects are split between Saudi Arabia and Rest of World and classified between growth projects, corporate research, corporate social responsibility, efficiency/debottlenecking/improvement, sustainability/SEEC, research center, regional hub, training facility and housing. The following is a summary of the key projects and agreements.

**PROJECTS IN SAUDI ARABIA**

RISK FACTORS

SABIC’s Enterprise Risk & Data Management is designed to safeguard the interests of SABIC stakeholders, including customers and employees, and to manage SABIC’s risks in a way that promotes our strategy of becoming the world’s preferred leader in chemicals.

All functions regularly provide coordinated reports to SABIC’s Executive Risk Management Committee. The SABIC Board of Directors & Risk and Sustainability Committee oversees the activities of the Enterprise Risk & Data Management department in assessing key business risks for the company.

Our risk management policy is to proactively identify assets and manage risks facing the company. In addition, we seek to evaluate their impact on our performances and take preventive measures to manage them. At the same time, we are leveraging opportunities in pursuit of our goals to meet our strategic objectives. The policy covers all our operations worldwide.

The responsibility for implementing our risk management policy rests with the Chief Executive Officer (CEO), whilst the responsibility for monitoring the implementation of this policy lies with the Board of Directors, supported by the Risk and Sustainability Committee. We have established an Integrated governance system to effectively identify, understand and manage the risks facing the company. It starts with our employees and management by developing detailed reports on the risks facing the company for the Risk and Sustainability Committee, which monitors these reports on a regular basis. The Risk and Sustainability Committee then makes recommendations to the Board of Directors on the efficiency of measures taken to minimize the impact of all risks. It also recommends the same measures to be taken if needed, or take additional measures to control these risks.

Principally, we are exposed to inherent risks, such as strategic risks, limiting our ability to achieve our strategic objectives. Operational risks derived from the nature of our operations and financial risks affect our profitability. Simultaneously, we are exposed to several risk factors.

Below are the main risks relating to our business and detailed description of the main risk factors:

- Insurance policies may not be sufficient to cover all risks that we face.
- We are exposed to customer credit risk.
- We need to maintain high capacity utilization rates in manufacturing facilities in order to maintain profit margins.
- We are exposed to risks relating to EHS & sustainability liabilities.
- We are exposed to risks in connection with capital expenditure.
- Oil and gas price fluctuations and a substantial or extended decline in cracking margins would negatively influence our financial results.
- We may experience difficulties in fulfilling our financial obligations or funding our planned capital expenditure.
- We are exposed to interest rate risk and foreign exchange risk.
- We are reliant on the performance of, and dividend distributions and other revenue flows from, our subsidiaries, joint ventures and affiliates.
- We are subject to global economic market conditions.
- The industries in which we operate are highly competitive.
- The cyclical nature of the petrochemicals industry may have a material and adverse impact on our business.
- Conditions affecting transportation of products may adversely affect the performance of our operations.
- Our Agri-Nutrients business is dependent on weather conditions and agricultural policies.
- We are subject to risks arising from international trade controls.
- Changes in laws or regulations, or a failure to comply with any laws and regulations, may materially and adversely affect our business.
- We are exposed to risks resulting from disputes and/or litigation.
- We are exposed to risks associated with the use of intellectual property and technology licenses.
- We are exposed to risks associated with the use of information technology.
- We are highly dependent on our personnel and management teams.
- We are exposed to risks arising from pension obligations.

INSURANCE POLICIES MAY NOT BE SUFFICIENT TO COVER ALL RISKS THAT WE FACE

The operations of SABIC companies are subject to hazards and risks inherent in, among other things, refining and petrochemicals operations. Such hazards and risks include fires, explosions, pipeline ruptures and spills, storage tank leaks, chemical spills, discharges or releases of hazardous substances or gases, environmental risks, mechanical failure of equipment at SABIC’s facilities, war, terrorism, sabotage and natural disasters. In addition, many of these risks may cause personal injury and loss of life, severe damage or destruction of SABIC’s properties and the properties of others including environmental pollution which may result in the suspension of operations and the imposition of civil or criminal penalties.

SABIC maintains insurance coverage in amounts that are consistent with relevant industry practice, including coverage for the risk of property damage, business interruption resulting from, among other things, fire or machinery breakdown and third party liability. SABIC could be subject to a material loss to the extent that a claim is made against SABIC which is not covered in whole or in part by insurance and for which third party indemnification is not available.

If SABIC’s companies suffer large uninsured losses or if any insured loss suffered by any such company significantly exceeds its insurance coverage, the business, results of operations or financial condition of such companies may be materially and adversely affected. This would in turn affect the ability of the portfolio of companies within SABIC to pay dividends, and make other distributions to SABIC and could have a material and adverse effect on SABIC’s business, results of operations or financial condition.

WE ARE EXPOSED TO CUSTOMER CREDIT RISK

SABIC provides services and products to a variety of customers and is subject to the risk of non-payment for the services and products that it has supplied, primarily through trade receivables. These risks are heightened when conditions in the industries in which its customers operate, or general economic conditions, deteriorate. SABIC has procedures in place to monitor credit risk on their receivables and continuously monitors customers’ credit limits and risk associated with it.

WE NEED TO MAINTAIN HIGH CAPACITY UTILIZATION RATES IN MANUFACTURING FACILITIES IN ORDER TO MAINTAIN PROFIT MARGINS

Earnings in the petrochemicals business are closely tied to global demand, industry inventory levels and plant capacity utilization. As higher production rates enable it to allocate fixed costs across larger production volumes and consequently impact profit margins, maximizing production rates is key to the profitability of SABIC’s petrochemicals operations.

SABIC’s manufacturing facilities are subject to a number of operational risks, including reduced utilization rates due to planned activities such as maintenance or shutdowns; unplanned outages which may, for example, be due to equipment or human failure; availability of skilled resources; lower than expected recovery rates; performance of SABIC’s contractors; strikes and civil unrest; corrosion problems impacting the plant and pipelines; health and safety incidents caused by third-party contractors; and exposure to natural hazards, such as extreme weather events. Any such incident could be expected to adversely affect SABIC’s business, results of operations or financial condition.

WE ARE EXPOSED TO RISKS RELATING TO EHS & SUSTAINABILITY LIABILITY

SABIC companies must comply with all EHS & sustainability related laws and regulations, which are applicable to their operations. These laws and regulations set various standards regulating certain aspects of EHS & sustainability. In addition, special provisions may be applicable in environmentally sensitive areas of operation.

Accidents involving SABIC’s products could cause severe damage or injury to property, the environment and human health, which could adversely affect SABIC’s business. SABIC’s business is inherently subject to the risk of spills, discharges or other releases of hazardous substances to the environment. SABIC uses feedstock for production, stores and transports chemical products that are volatile, explosive and/or the release of which may have an adverse impact on the environment. Environmental risks associated with SABIC’s operations include:

- Fire/explosions at SABIC’s production or logistics facilities;
- Discharges of toxic gases into the atmosphere; and
- Discharge of hazardous chemicals on land or in waterways.

Accidents involving these or other substances could result in fire, explosions, severe pollution or other catastrophic circumstances, which could cause severe damage or injury to persons, property or the environment as well as disruptions to SABIC’s business. Such events could result in equipment failures or shutdowns, civil lawsuits, criminal investigations and regulatory enforcement proceedings, any of which could lead to significant liabilities for SABIC. Any damage to persons, equipment or property or other disruption to SABIC’s ability to produce or sell its products could result in a significant decrease in SABIC revenues and profits and significant additional cost to replace or repair SABIC’s assets.
**RISK FACTORS CONTINUED**

**WE ARE EXPOSED TO RISKS IN CONNECTION WITH PROJECTS UNDER DEVELOPMENT**

SABIC has a number of significant capital projects (such as investment in new production plants, expansion of existing plants and the upgrading of existing plants) under development or in the planning stages. Other additional capital projects may be undertaken during the term of the Report. Each of these projects entails a number of risks during construction such as the risk of investment cost over-run, the risk of delayed or incomplete start-up, the risk of any default by any appointed contractor or sub-contractor or their ability to comply with their contractual obligations, shortages or increases in the costs of equipment, breakdown or failure of equipment, processes or technology, difficulties in connecting any related upstream or downstream facility, timely availability of the required feedstock at the time of commencement of commercial operations, start-up or commissioning problems, problems with effective integration of operations, increased operating costs, exposure to unanticipated liabilities, changes in taxes or duties, difficulties in achieving projected efficiencies, synergies and cost savings, and changes in market conditions. If any of these risks materialize, the overall profitability of the relevant project would be materially adversely affected. If any new project fails to achieve the expected levels of performance or profitability, this could have a material and adverse effect on SABIC’s business, results of operations or financial condition.

**OIL AND GAS PRICE FLUCTUATIONS AND A SUBSTANTIAL OR EXTENDED DECLINE IN CRACKING MARGINS WOULD NEGATIVELY INFLUENCE OUR FINANCIAL RESULTS**

SABIC’s financial results are significantly impacted by the margin between the prices at which SABIC sells products and the prices at which SABIC purchases feedstock for use, particularly in its petrochemicals business. However, the price of SABIC’s feedstock and the price of the product sold to customers depend on the type of product, the location of the production and the location of the customer. SABIC’s results of operations can be significantly impacted by fluctuations in the prices of a number of commodities, primarily oil, its derivatives and gas. SABIC’s two main feedstocks in Saudi Arabia (methane and ethane) are based on prices set by the Minister of Energy, Industry and Mineral Resources in Saudi Arabia. The rest of SABIC’s feedstocks are subject to various fluctuations in feedstock prices. SABIC’s petrochemical manufacturing operations outside Saudi Arabia generally use oil derivatives (mainly naphtha) as feedstock and purchase such feedstock in the international markets at market prices. Many of SABIC’s sales relate to petrochemical products and sales prices for petrochemical products generally change in tandem with changes in oil prices, albeit sometimes with a time delay and with different dynamics in different regions.

Therefore, during times of increasing oil prices, as manufacturers are unable to shift all such increases to their customers, the cracker margin of SABIC’s operations outside Saudi Arabia decrease in comparative terms. As a result, the margins in the SABIC’s gas-based operations (mostly in Saudi Arabia) improve significantly in periods with higher oil prices (and higher petrochemical prices) and decline in periods of low oil prices while the margins in SABIC’s operations (mostly outside Saudi Arabia and some of the operations in Saudi Arabia) increase profitability in periods of low oil prices.

**WE MAY EXPERIENCE DIFFICULTIES IN FULLFILLING OUR FINANCIAL OBLIGATIONS OR FUNDING OUR PLANNED CAPITAL EXPENDITURE**

Any disruption in the global credit markets, re-pricing of credit risk and any difficulties in the conditions of the financial market may impact SABIC’s ability to fund its businesses or projects at all or in a similar manner, and at a similar cost, to the funding raised in the past. If the repayment of any loans or other debt instruments in respect of financing taken by SABIC or its subsidiaries cannot be refinanced or extended at acceptable terms, or paid with the proceeds of other transactions, SABIC’s cash flows and financial results would be adversely affected. If prevailing financing costs or other factors at the time of any such refinancing result in higher financing costs, such increased financing costs would adversely affect SABIC’s financial results.

In addition, SABIC is engaged in a number of significant capital projects, which will require significant capital expenditure to complete. The ability of SABIC to obtain external financing and the cost of such financing depends on numerous factors, including the general economic and market conditions, international interest rates, credit availability from banks or other financiers, investor sentiment towards emerging markets, market confidence in SABIC and the credit rating and financial condition of the relevant borrower. External funding may not be available to SABIC on acceptable terms. If SABIC raises additional debt in the future, it may become subject to additional or more restrictive financial covenants and ratios or may be required to extend security over its assets for the benefit of lenders. Any such increased indebtedness may require a substantial portion of cash flow from operations to be dedicated to the payment of principal and interest (to the extent payable) on SABIC’s indebtedness, thereby reducing the SABIC’s ability to use its cash flow to fund its operations and future business opportunities. Additionally, this may limit SABIC’s ability to raise capital to fund any future capital expenditure or operations, expose SABIC to the risk of increased interest rates and/or increased costs to hedge interest rates and expose SABIC to refinancing risk, to the extent that SABIC is unable to repay its borrowings out of operating cash flow. If SABIC is not able to obtain adequate financing or other capital contributions to fund capital and investment expenditures in the future, this could require SABIC to alter, reduce the scope of, defer or cancel such projects which may, in turn, affect the profitability and competitiveness of SABIC’s operations.

**WE ARE EXPOSED TO INTEREST RATE RISK AND FOREIGN EXCHANGE RISK**

SABIC is subject to interest rate risks in the ordinary course of business, primarily because of its long-term debt obligations with floating interest rates. Interest rate risks result from potential changes in prevailing market interest rates. These can cause a change in the present value of fixed-rate instruments and fluctuations in the interest payments for variable-rate instruments, which would positively or negatively affect earnings. Any future unhedged interest rate risk may result in an increase in SABIC’s interest expense and may have a material adverse effect on SABIC’s business, results of operation and financial condition.

Furthermore, SABIC operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to fluctuations of other currencies against the Saudi riyal. This exposure is primarily through account receivables, trade payables and certain non-SAR denominated bank accounts and borrowings. However, as long as the Saudi riyal is pegged to the US dollar and SABIC’s business is primarily conducted in US dollars, SABIC does not have any significant exposure to US dollars. As a result, the most significant foreign currency to which SABIC is exposed is the euro. SABIC is also exposed to a lesser extent to the British pound, Japanese yen and Chinese yuan. SABIC’s policies require subsidiaries to conduct a regular review of currency exposures, while SABIC manages all derivative executions centrally. However, there can be no assurance that any hedges will adequately protect SABIC or that any future currency exchange rate fluctuations may not have an adverse effect on SABIC’s business, results of operations or financial condition.

SABIC intends to continue devoting a substantial amount of expenditure to the research and development functions of its business.
A key component of SABIC’s strategy is to introduce new products and applications that offer distinct value for customers.

WE ARE RELIANT ON THE PERFORMANCE OF, AND DIVIDEND DISTRIBUTIONS AND OTHER REVENUE FLOWS, FROM OUR SUBSIDIARIES, JOINT VENTURES AND AFFILIATES

SABIC conducts its operations principally through, and derives most of its revenues from, its subsidiaries, joint ventures and affiliates, and has limited revenue-generating operations of its own. Consequently, SABIC’s cash flows and ability to meet its cash requirements, including its obligations, depends upon the profitability and cash flows from its subsidiaries, joint ventures and affiliates. This includes their ability to make dividend distributions to SABIC, repay interest on intercompany loans extended to them by SABIC and pay fees to SABIC for any inter-company services provided to them (such as the sale of their products, providing/sub-licensing technology licenses and providing catalyst supplies as well as providing certain administrative and other technical services).

In particular, SABIC conducts certain business operations through joint ventures, which are not controlled by SABIC. SABIC may also enter into additional joint ventures in the future. Some of SABIC’s joint ventures with third parties are managed by the respective joint venture’s own board of directors who are mandated to make business, financial and management decisions by taking into account the corporate interest of the relevant joint venture company. Such decisions may therefore not be solely in the interests of SABIC and may reflect the interests of the other joint venture partners, including in relation to dividend distributions. In addition, SABIC’s joint venture partners may breach their obligations to SABIC or the joint venture, have economic or business interests inconsistent with SABIC’s or the joint venture’s interests and/or take actions contrary to SABIC’s objectives or policies, any of which may result in disputes between SABIC and its joint venture partners.

Any decline in such subsidiaries, joint ventures or affiliates profitability could affect their ability to pay dividends, interest and/or make other payments to SABIC and, in turn, could have a material and adverse effect on SABIC’s results of operations and financial condition.

WE ARE SUBJECT TO GLOBAL ECONOMIC MARKET CONDITIONS

SABIC faces risks attendant to changes in the economic environment globally and in the major regions where it conducts its business. In particular, SABIC’s performance is particularly influenced by economic cycles affecting end-user industries, such as the construction and automotive industries, since the products manufactured by SABIC are used as intermediates in the manufacturing of the products utilized by such companies. In the last decade, the global economy has continued to experience periods of slowdown, high volatility, reduced business activity, unemployment, decline in interest rates and erosion of consumer confidence, that have affected downstream demand for chemical and plastic products in certain industry sectors and regions. Any downturn in regional or worldwide economies, market crisis or prolonged periods of instability could have a material and adverse effect on SABIC’s business, results of operations or financial condition. In particular, a worsening economic climate can result in decreased industrial output and decreased consumer demand for products, including automotive products, consumer goods, packaging, industrial goods, textiles and agricultural goods, all of which incorporate SABIC’s products globally or in some regions where SABIC conducts its business.

THE INDUSTRIES IN WHICH WE OPERATE ARE HIGHLY COMPETITIVE

The markets for most of SABIC’s products are highly competitive. SABIC is exposed to the competitive characteristics of several different geographic markets and industries. SABIC’s principal competitors vary from product to product and range from large global chemical companies to numerous smaller regional companies. Some of SABIC’s competitors are larger and more vertically integrated than SABIC (in terms of their upstream and/or downstream production) and therefore may be able to manufacture products more economically than SABIC.

A key component of SABIC’s strategy is to introduce new products and applications that offer distinct value for customers. SABIC intends to continue to devote substantial resources to the development of new technologically advanced products and processes and to continue to devote a substantial amount of expenditure to the research and development functions of its business.

SABIC’s financial condition and results of operations may be adversely affected if competitors develop or acquire intellectual property rights to technology, especially if SABIC’s innovation lags behind the rest of the industry or if SABIC fails to innovate and introduce successful new products.

THE CYCLICAL NATURE OF THE PETROCHEMICALS INDUSTRY MAY HAVE A MATERIAL AND ADVERSE IMPACT ON OUR BUSINESS

The petrochemicals industry is subject to the cycles of expansion and contraction in line with movements in the global economy, which create swings in the supply and demand of petrochemicals products and volatility in the prices of feedstock as well as finished petrochemical products. Due to this cyclical, historically the international petrochemical markets have experienced alternating periods of limited supply (which has caused prices and margins to increase), followed by an expansion of production capacity (which has resulted in oversupply, lower prices and reduced margins).

CONDITIONS AFFECTING TRANSPORTATION OF PRODUCTS MAY ADVERSELY AFFECT THE PERFORMANCE OF OUR OPERATIONS

SABIC’s operations rely on the transportation of materials, primarily exports of finished products, by sea and by railcars and trucks overland. Although SABIC seeks cost efficiencies in the distribution of its finished products, there can be no assurance that these transportation costs will not significantly increase in the future, which may reduce SABIC’s competitive advantage compared to regional producers.

Any issue affecting cargo transportation by sea, such as speed due to weather conditions or natural disasters, among others, could adversely affect SABIC’s results of operations or financial condition. Further, some of the products that are required for transportation are classified as hazardous. SABIC’s operations elsewhere around the world also rely on various forms of transportation to get the finished products to customers. Geopolitical issues, acts of war, trade blockades and piracy affecting these various forms of transportation could adversely affect SABIC’s business, results of operation and financial condition.

OUR AGRI-NUTRIENTS BUSINESS IS DEPENDENT ON WEATHER CONDITIONS AND AGRICULTURAL POLICIES

The agricultural industry is heavily influenced by local weather conditions. Significant deviations from typical weather patterns of a given region, variations in local climates or major weather-related disasters may reduce demand for the products of the SABIC’s Agr-Nutrients business, particularly in the short term, if agricultural products or the land on which they grow are damaged or if such deviations, variations or disasters reduce the incomes of growers and thus their ability to purchase the SABIC’s products. The effects of adverse weather conditions, in particular, can be very significant, resulting in delays or intermittent disruptions during the planting and growing seasons, which may, in turn, cause agricultural customers to use different forms of fertilizer, because fertilizers are applied at specific times. Similarly, adverse weather conditions following harvest may delay or eliminate opportunities to apply fertilizer in the autumn, which is the season when fertilizers are applied in certain geographies. Weather can also have an adverse effect on crop yields, which lowers the income of growers and could impair their ability to purchase fertilizers.

WE ARE SUBJECT TO RISKS ARISING FROM INTERNATIONAL TRADE CONTROLS

SABIC exports products to countries, which have adopted trade defense instruments such as anti-dumping and anti-subsidies laws and regulations. Failure to comply with international laws and regulations may result in anti-dumping or anti-subsidies duties being imposed on imports of products into such countries. Moreover, SABIC’s imports and exports are affected by discretionary import duties that may be imposed by some governments.

SABIC considers that the use of trade defense measures and other forms of trade controls by some countries is likely to increase in the future. Any trade defense measures or duties imposed on exports or imports from SABIC’s, its suppliers or customers could have a material and adverse effect on SABIC’s business, results of operations or financial condition.

WE ARE SUBJECT TO RISKS ARISING FROM DEFECTIVE PRODUCTS

A number of products produced by SABIC companies are developed from highly complex and technical manufacturing processes and, accordingly, there is a risk that defects may occur in any of such products. Such exposure is increased when customers integrate SABIC’s products into consumer products, which are then on-sold to consumers. While SABIC limits its liability to its customers for product defects under sale and purchase agreements, the legal systems in a number of countries impose a strict liability on the manufacturer or the importer...
of products, which cannot be limited. Defects in products manufactured by SABIC can give rise to significant costs, including expenses relating to recalling end-use products by downstream customers or their own customers, replacing defective items, warranty claims, including liability for damages caused by such defects. Any or all of such events could have a material and adverse effect on SABIC’s business, results of operations or financial condition as well as its reputation.

CHANGES IN LAWS OR REGULATIONS, OR A FAILURE TO COMPLY WITH ANY LAWS AND REGULATIONS, MAY MATERIALLY AND ADVERSELY AFFECT OUR BUSINESS

SABIC is subject to various laws and regulations. Such laws and regulations may relate to licensing requirements, EHS issues, asset and investment controls, marketing guidelines and a range of other requirements. In particular, SABIC’s petrochemicals are subject to a variety of laws and governmental regulations relating to the use, discharge and disposal of toxic or otherwise hazardous materials used by such businesses. Compliance with such laws and regulations can be costly, and SABIC incurs and will continue to incur costs, including capital expenditures, to comply with these requirements. Furthermore, failure to comply with such regulations or any changes to such regulations, including the introduction of additional regulations, could have a material and adverse effect on SABIC’s business, results of operations or financial condition.

SABIC is subject to risks relating to legal and regulatory proceedings to which it or its subsidiaries, associates and joint ventures are currently a party or which could develop in the future. These may include, in particular, risks relating to product liability, competition and antitrust law, export control, data protection, patent law, procurement law, tax legislation and environmental protection in the countries where SABIC operates. SABIC’s involvement in litigation and regulatory proceedings may result in the imposition of fines or penalties or could adversely affect its reputation. Any of the foregoing could have a material and adverse effect on SABIC’s business, results of operations or financial condition.

SABIC is subject to risks relating to legal and regulatory proceedings to which it or its subsidiaries, associates and joint ventures are currently a party or which could develop in the future. These may include, in particular, risks relating to product liability, competition and antitrust law, export control, data protection, patent law, procurement law, tax legislation and environmental protection in the countries where SABIC operates. SABIC’s involvement in litigation and regulatory proceedings may result in the imposition of fines or penalties or could adversely affect its reputation. Any of the foregoing could have a material and adverse effect on SABIC’s business, results of operations or financial condition.

SABIC is subject to risks relating to legal and regulatory proceedings to which it or its subsidiaries, associates and joint ventures are currently a party or which could develop in the future. These may include, in particular, risks relating to product liability, competition and antitrust law, export control, data protection, patent law, procurement law, tax legislation and environmental protection in the countries where SABIC operates. SABIC’s involvement in litigation and regulatory proceedings may result in the imposition of fines or penalties or could adversely affect its reputation.

Any of the foregoing could have a material and adverse effect on SABIC’s business, results of operations or financial condition as well as its reputation.

SABIC uses and manufactures hazardous chemicals that are subject to regulation by the EU, by many national, provincial and local governmental authorities in the countries in which SABIC operates. In order to obtain regulatory approval of certain new products and production processes, SABIC must, among other things, demonstrate to the relevant authorities that the product is safe for its intended uses and that SABIC is capable of manufacturing the product in accordance with applicable regulations. The process of seeking and obtaining regulatory approvals can be time-consuming and subject to unanticipated and significant delays. Regulatory approvals may not be granted to SABIC on a timely basis, or at all. Any delay in obtaining, or any failure to obtain or maintain, these regulatory approvals would adversely affect SABIC’s ability to introduce new products, to continue distributing existing products and to generate revenue from those products, which could have a material adverse effect on its business, results of operations or financial condition. In addition, new laws and regulations may be introduced in the future that could result in additional compliance costs, confiscation, recall or monetary fines, any of which could prevent or inhibit the development, distribution and sale of SABIC’s products. The regulation or reclassification of any of the SABIC’s raw materials or products could adversely affect the availability or marketability of such products, result in a ban on their import, purchase or sale, or require SABIC to incur increased costs to comply with notification, labelling or handling requirements, each of which could adversely affect SABIC’s business, results of operations or financial condition.

SABIC is subject to risks relating to legal and regulatory proceedings to which it or its subsidiaries, associates and joint ventures are currently a party or which could develop in the future. These may include, in particular, risks relating to product liability, competition and antitrust law, export control, data protection, patent law, procurement law, tax legislation and environmental protection in the countries where SABIC operates. SABIC’s involvement in litigation and regulatory proceedings may result in the imposition of fines or penalties or could adversely affect its reputation. Any of the foregoing could have a material and adverse effect on SABIC’s business, results of operations or financial condition.

SABIC operates in various countries. The nature and extent of SABIC’s operations in these countries are subject to a variety of laws and governmental regulations relating to the use, discharge and disposal of toxic or otherwise hazardous materials used by such businesses. Compliance with such laws and regulations can be costly, and SABIC incurs and will continue to incur costs, including capital expenditures, to comply with these requirements. Furthermore, failure to comply with such regulations or any changes to such regulations, including the introduction of additional regulations, could have a material and adverse effect on SABIC’s business, results of operations or financial condition.

Global economic growth is expected to continue to decelerate in 2020, with the weakness in economic growth attributed to falling growth in major advanced economies and China and the adverse impact of the recent outbreak of novel coronavirus in China.

In the US, an increase in federal spending under the 2019 Budget Act, an accommodative monetary policy, easing financial conditions, an improvement in trade relations with China, robust private consumption and solid employment and income growth are expected to support economic growth, whereas weaker fixed investment growth, capacity constraints, a strong dollar and decelerating global economic growth will weigh on growth. On balance, US real GDP growth is projected to continue softening in 2020. The US Federal Reserve Bank is also expected to maintain its highly accommodative monetary policies to support growth, though the marginal impact of its policy on US economic growth will keep on waning.

China’s economic growth is expected to continue decelerating in 2020, reflecting slowing domestic demand growth in the wake of the government’s measures to rein in the country’s high private-sector debt and to accelerate China’s transformation from an export- and investment-led model to a private consumption-led model, as well as the negative impact of the recent outbreak of novel coronavirus in China. However, the Chinese government is expected to continue to provide measured fiscal and monetary stimulus in 2020, thereby ensuring that China’s economic growth decelerates at a more moderate pace. The phase-one trade deal with the US signed in January 2020 will also provide some support to growth.

The weakness of the Eurozone economy will further increase in 2020, with the Eurozone and all major economies of the Eurozone recording a slowdown in economic growth. Moderation of investment and consumption and unfavorable export prospects will be the major reasons for the softening economic growth. The ECB is expected to deliver additional monetary policy stimulus in 2020, although its accommodative monetary policy will continue to produce diminishing marginal benefits.

Authorities in Saudi Arabia will continue to make progress with structural reforms targeting education, labor, and housing.
OUTLOOK FOR 2020
CONTINUED

Petrochemical Industry Trends
The global petrochemical industry is expected to continue to grow in 2020 with the US and Asia leading this growth. The ethylene chain is expected to be the most challenged chain as supply surpass demand growth with additions across the chain supported by low US natural gas price that expected to hit record low, as a result, petrochemicals prices expected to remain under pressure during 2020.

Low global demand for methanol especially in the US, China and India and more cheap supply from US and Iran will continue to weigh on prices. Low prices in EU are expected to be maintained by the ongoing suspension of duty on methanol arriving into the EU implemented by the European Commission, which was extended until further notice. Margins for 2020 are expected to slightly decline in most regions. Weak global demand for PE and additional US exports, plus new Chinese capacities, are expected to maintain pressure on prices. US now already doubled its exports to the world during 2019, selling at historical low prices. Sustainability efforts by governments around the globe are expected to trim demand for virgin resins via bag bans, which is also driven by consumer preferences. Slightly lower margins are expected during 2020 for most regions. Margins for Asian naphtha-based producers expected to remain close to or even below breakeven thresholds. The US is also expected to increase ethylene glycol exports to the world, and China is adding more capacities that are leading to higher availability and less imports on top of weak global demand, adding more pressure on prices and margins. Demand from all derivatives is expected to be weak in all regions and will be heavily impacted by production cutbacks among Chinese PET producers due to weak market, high inventory and poor operating economics as a result of lengthy supply. Profit margins for 2020 are expected to slightly decline compared to previous year. Margins for Asian naphtha-based producers are expected to remain close to or even below breakeven thresholds.

Upstream Trends
Weak demand for oil and plenty of supply is expected during 2020, driven by strong US production amid slower global economy growth, lower demand for jet fuel due to movement restrictions imposed by governments around the world to trips to and from Asia due to coronavirus will add to the pressure on prices. Global naphtha price expected to decline with crude weakness amid expectation of soft demand. US natural gas price is expected to hit record low as a result of continuous strong production and stagnated demand. A plentiful surplus of ethane in the US will keep pressure on prices. Tracking naphtha price, liquefied petroleum gas prices are expected to show a downward trend driven by strong production and weak demand.

Sabic Outlook for 2020
Sabic’s performance in 2020 is expected to be in line with global petrochemical industry trends. In 2020, Sabic will further increase focus on “self-help” initiatives to maximize profitability. The focus will particularly be on optimization of low-profitability products and assets in the portfolio, and further curtailment of non-discretionary spend. While benefits from previous optimization initiatives will assist in dampening the impact of market headwinds, Sabic’s plans for profitable and sustainable growth will continue. Sabic will also continue to invest in innovation, actively seek opportunities, and bring optimization through transformation. The global petrochemical industry is expected to continue to grow during 2020, with the US and Asia leading this growth.

Unlike the automotive industry, the construction industry is expected to improve in 2020 driven by growth in Asia Pacific.

Industry Trends
The world’s global industrial production growth is expected to improve in 2020 after bottoming out in 2019. The improvement will likely be somewhat broad based, with industrial production growth increasing in most advanced economies and emerging economies in 2020. Among major economies, the Eurozone and Japan will likely see an improvement in industrial production growth, whereas the US and China are expected to experience a decline in industrial production growth.

Industry Segment Trends
The world’s industrial production growth is expected to witness lower growth in 2020, with the US, EU and Asia economies experiencing slower growth in addition to the disruptions to industries supply chains caused by coronavirus. The petrochemicals dependent industry sectors are expected to witness diverse trends. The automotive industry is expected to remain in contraction mode during 2020 as a result of slowdown in the US, China and Europe. Unlike the automotive industry, the construction industry is expected to improve in 2020 driven by growth in Asia Pacific. The textile and electronic industries are expected also to grow in 2020 as demand for these sectors less affected by global economic slowdown. Healthcare sectors are expected to benefit from governments’ efforts to fight coronavirus.

Among major economies, the Eurozone and Japan will likely see an improvement in industrial production growth.

Far left: The electronic and textile industries are expected to grow in 2020.
Left: The world’s global industrial production growth is expected to improve in 2020.
CORPORATE GOVERNANCE
SABIC’s governance framework aligns each governance element to the organization’s purpose and objectives.

Corporate Governance Structure

SABIC is committed to the highest standards of corporate governance and applies all applicable provisions of the Corporate Governance Regulations issued by the CMA (subject to certain permitted derogations) as well as international governance principles and best practices, where applicable. SABIC has developed a corporate governance framework, which includes regulations and policies that promote transparency, accountability and competence.

SABIC’s management structure consists of a board of directors (the “Board”), four board committees and a team of executive officers (the “Executive Management”). The Board has overall responsibility for establishing, overseeing and reviewing SABIC’s governance principles and policies in order to ensure that SABIC is in compliance with relevant regulations while, at the same time, enhancing the growth and sustainability of SABIC.

The Board has formed three committees, in addition to the Audit Committee, which was formed by the general assembly, to assist it with the performance of its functions, namely, the Nomination and Remuneration Committee, the Risk and Sustainability Committee and the Investment Committee. The performance of these committees is subject to periodic review according to several factors, including the need of the relevant committee to continue supporting the Board. The Executive Management is responsible for the day-to-day management of SABIC’s operations.

Lastly, shareholders are among the most critical part of SABIC Governance Framework. The Board Charter requires that “the Board member must attend General Assembly Meetings”. By this mandate, the Board aims to meet with shareholders and receive their suggestions and observations about the company and its performance.

The company’s Articles of Association ensure shareholders’ participation in the deliberations and discussions at General Assembly Meetings. In addition, to enhance communication with shareholders, the Board has adopted Disclosure Policy and Procedures including processes to ensure that shareholders have the right to inquire and request information, and have queries answered, in a manner that does not harm the interests of the company.
SHAREHOLDERS

OWNERSHIP STRUCTURE

SABIC was established by the Government of Saudi Arabia as a 100% state-owned company. SABIC’s shares were listed on the Saudi Stock Exchange in 1984, at which time the Government divested 30% of its shareholding in SABIC. As at 31 December 2019, SABIC had issued and paid up share capital of SAR 30,000,000,000 consisting of 3,000,000,000 shares of SAR10 par value per share. The following entity holds more than 5% of SABIC’s issued shares:

<table>

<td>2,100,000,000</td>
<td>70%</td>
</tr>
<tr>
<td>– wholly-owned by the Government</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The remaining SABIC shares are owned by other investors, including certain institutions and private investors. Certain shares are also held by SABIC’s Board of Directors and Senior Executives. Other than the Government, SABIC is not aware of any shareholder that, directly or indirectly, owns or could exercise control over SABIC. In addition, SABIC has not been informed by persons (other than the Board, Senior Executives and their relatives) who own SABIC shares, for their holdings, together with any change to such interests during the last fiscal year. On March 27, 2019, the Public Investment Fund (PIF) and Saudi Aramco signed a share purchase agreement, pursuant to which Saudi Aramco has agreed to acquire all of PIF’s stake in SABIC. Completion of the transaction is subject to customary closing conditions, including regulatory approvals. Upon completion of the transaction, Saudi Aramco will own 70% of SABIC’s outstanding share capital.

DESCRIPTION OF DIVIDEND POLICY

Dividend is subject to realized net income and free cash flow during the year and according to Article (41) of the Company Bylaw, which reads as follows:

1. Annually, the Corporation shall set aside ten percent (10%) of the net profits to form the statutory reserve. The Ordinary General Meeting may decide to stop this deduction whenever the said reserve amounts to thirty percent (30%) of the capital of the Corporation. If in any year, the reserve falls below thirty percent (30%) of the capital, the Corporation shall again set aside until the reserve amounts to thirty percent (30%) of the capital. The Ordinary General Meeting has the authority to decide other kinds of reserves.

2. After deducting the statutory reserve and any other reserve that may be decided by the Ordinary General Meeting, five percent (5%) of the paid-up capital shall be distributed from the annual net profits of the Corporation, to the shareholders as initial dividend.

3. With due regard to the provisions of the Companies Law, the required amount shall be allocated for the Board members’ remuneration approved by the Ordinary General Meeting in compliance with Article (15) of this Bylaws provided that entitlement for such remuneration shall be proportional to the number of sessions attended by the member and the member’s jurisdictions and responsibilities. Thereafter, the balance shall then be distributed to the shareholders as an additional dividend or carried over to the subsequent years.

Note that the Board of Directors had approved 1st half dividend and recommended 2nd half to the General Assembly to distribute dividends for 2019 as follows:

ENGAGEMENT WITH CAPITAL MARKETS

We aim to have a world-class engagement with all participants of Capital Markets. Our approach is to build sustainable relationships with all Capital Markets participants to communicate the SABIC investment story, growth strategy and how SABIC will build value over time. We aim to implement our approach structurally and consistently.

Saudi Arabia has been reclassified from Frontier Market to Emerging Market by several financial market indices starting mid-2018. Since then, international investors have shown increased interest in SABIC. Along with the reclassification, over the last two years we have increased our investor engagement substantially. We engaged with more than 300 participants in the Capital Markets, including institutional investors and sell side analysts, 50% more than the previous year, roadshows and conferences worldwide.

We engaged with more than 300 participants in the Capital Markets, including institutional investors and sell side analysts, 50% more than the previous year, roadshows and conferences worldwide.

Foreign ownership represented less than 0.5% of the total shareholding at the beginning of 2019. The year closed with 4.5%, with a mix of passive, active and sovereign wealth funds as new investors.

Our increased engagement has been recognized with the “Best Investor Relations Program in Chemicals” covering the emerging EMA region. This recognition is based on a global survey conducted every year during March and April by Institutional Investor.

Earlier in the year, Investor Relations received two more nominations: Most Improved Investor Relations team in MENA region – Blueship (above USD10bn); and Leading Corporate for Investor Relations – Saudi Arabia, certifying that we are walking in the right direction.

As we head into 2020, we are working hard to introduce regular quarterly investor calling cards, increase business leaders’ exposure with investors, integrate our strong Environment, Social and Governance (ESG) story into the investment story and many more engagements.

Below is our Investor Relation Calendar for 2020.

BOARD OF DIRECTORS

The Board of Directors and the Vice Chairman and CEO shall serve on a full-time basis and shall act in lieu of the Chairman in case of his absence. The Board members shall be elected by an ordinary general meeting for a renewable term not exceeding three years. Moreover, the ordinary general meeting shall specify the remunerations and allowances of the members of the Board in compliance with Companies Law and the rules and instructions issued by the competent authority; whether such remuneration consists of a specified salary, an attendance allowance for the meetings, or a percentage of profits. The remuneration may consist of a combination of two or more of these benefits. The annual report of the Board shall include an illustration of the remunerations and allowances paid to the Board members.

During 2019, the election of the members of the Board of Directors (including representatives of the government of Saudi Arabia) was approved for another term, which started from 10 April, 2019, for a period of three years ending on 09 April, 2022.

Dr. Fahad Abdullah Al-Mubarak, was a Non-Executive Member in SABIC and his membership ended on 10 April, 2019. He has previously served as the Governor of the Saudi Arabian Monetary Agency, the Chairman of the board of the Saudi Stock Exchange (Tadawul) and a member of the Consultative Council. He was also a part of the Saudi negotiating team established to discuss participation in gas projects in Saudi Arabia with international oil companies. Dr. Al-Mubarak also previously served as a member of the board of a number of companies, including Al Alamiyah Insurance, Al Malaz Group, Mobil, Saudi Hollandi Bank, National Industrialization, and Saudi Telecommunications Company. He was also the Chairman of the board of Morgan Stanley Saudi Arabia and the General Manager of Rana Investment Company. He holds a PhD in Business Administration.

BOARD EVALUATIONS

The Board of Directors has set forth procedures for evaluating the work of the Board and Committees periodically in both the Board Charter and all Committees Charters. The Board established a comprehensive program to evaluate the work of the Board, and contracted with COMPASS – an independent external agency specialized in this area – for implementation. In addition, the company is implementing the program through the use of applicable systems for program implementation.
We will continue to invest in our people and business for long-term growth and competitiveness without compromising on our safety culture.
Dr. Aljarbou is well-known in Saudi Arabia’s working experience. And he was appointed as Chairman of the current position. Dr. Aljarbou was Managing Director and CEO of the company as General Manager, Projects Execution, from 1988-1992. He served as Chairman of the Board of Directors of Saudi Arabian Mining Company (Ma’aden), 1997-2011; Malath Cooperative Insurance Company, 2007-2010; Chamber of Commerce, and Industry, 1997-2000; and the Royal Commission for Jubail and Yanbu, 1995-2002. He was Chair of the Board of Directors of the Industrial Clusters Development Program, and the National Industrial Clusters Development Program, and an Executive Committee member of the Riyadh Economic Forum at the Riyadh Chamber of Commerce.

In addition, during 2019 Mr. Al-Benyan was appointed as the Chairman of the B20 Saudi Summit. Prior to being named Vice Chairman and Chief Executive Officer, Mr. Al-Benyan also served as Executive Vice President, Corporate Finance, and CFO.

A U D I T  C O M M I T T E E

According to its charter, the Audit Committee shall comprise three to five non-executive members of the Board, at least one of whom shall be an independent member. These members are nominated by the Board and appointed by a resolution of the General Assembly of SABIC’s shareholders.

The following table lists Committee members, their membership, and their participation in Committee meetings, as well as the number and date of the meetings.

The Audit Committee’s responsibilities include:

- Oversight of financial reporting, including: (i) reviewing the Group’s financial statements; (ii) providing technical opinion(s) as to the Board report and financial statements being in compliance with the regulatory requirements; (iii) examining unusual transactions in the financial statements; (iv) verifying accounting estimates; and (v) reviewing financial and accounting policies of the Group;

- Oversight of internal control systems, including: (i) reviewing internal and financial control and risk management systems and ensuring their effectiveness through regular reports prepared by the Internal Audit Department (or External Auditor) and following up on the implementation of recommended action; and (ii) reporting to the Board in respect of the adequacy of internal control systems;

- Oversight of internal audit, including: (i) supervising the Internal Audit Department and verifying its effectiveness in carrying out its roles and responsibilities; (ii) reviewing and approving the annual audit plan; (iii) reviewing reports prepared by the Internal Audit Department and following up on the implementation of recommended action; (iv) ensuring the independence of the Internal Audit Department; and (v) evaluating the performance of the head of the Internal Audit Department;

- Oversight of the external auditor, including: (i) recommending the appointment or dismissal of the external auditor and determining their fee after assessing their performance, independence, scope of work and terms of employment; (ii) verifying the independence of the external auditor; (iii) reviewing the external audit plan and verifying the compliance of this plan with applicable regulations; (iv) answering the external auditor’s queries and providing requisite support for the performance of an external audit; and (v) reviewing reports prepared by the external auditor and following up on the implementation of recommended action; and

- Oversight of compliance, including: (i) reviewing reports prepared by regulatory bodies in respect of compliance with applicable regulations and following up on the implementation of recommended action; (ii) ensuring SABIC’s compliance with relevant regulations, by-laws and policies; (iii) reviewing proposed related party transactions; (iv) establishing appropriate procedures for internal reporting of violations of internal control (including ensuring independence of such procedures); and, where relevant, making recommendations.

B I O G R A P H I E S  o f  C O M M I T T E E  M E M B E R S

Mr. Abdulaziz Habdan Al-Habdan retired from General Organization for Social Insurance. He was the Assistant Governor for Insurance Affairs, General Organization for Social Insurance. In addition, he has previously served as a board member of several joint stock companies, including SABIC, Banque Saudi Fransi, Bank AlJazira, Alianz Saudi Fransi Cooperative Insurance, Makkaah Medical Center and Saudi Telecom Company (STC). Currently, he is a board member of Saudi Arabian Fertilizer Company (SAFCO) and Saudi Fransi Capital as well as the chairman of SAFCO’s Audit Committee. Mr. Al-Habdan holds a Master’s Degree in Business Administration.

Dr. Abdul Rahman Ibrahim Al-Humaid’s membership of the Audit Committee ended on 10 April, 2019. He is the Chairman of Bank Al Bilad. He was a University Professor. He is the Founder and Chairman of the National Advisory House. He was a member of the Board of Trustees of the International Financial Reporting Standards. In addition he is a member of several Audit Committees in a number of companies and banks. Mr. Al-Humaid holds a Ph.D. in Accounting.

Dr. Khalid Dawood Al-Fadag currently holds no position. He was a General Auditor of Saudi Aramco. He was a Director of Facilities Planning at Saudi Aramco and a CEO of Petron. Dr. Al-Fadag holds a Ph.D. in Applied Mechanical Engineering.
BOARD COMMITTEES CONTINUED

REMNUNERATION AND NOMINATION COMMITTEE

According to its charter, the Remuneration and Nomination Committee shall comprise three to five non-executive members of the Board, at least one of whom shall be an independent director. These members are appointed by the Board.

MANAGEMENT MEMBERS BIOGRAPHIES

YOUSEF ABDULLAH AL-BENYAN
Vice Chairman and CEO

ABDULAZIZ AL-OU丹
Executive Vice President
Corporate Human Resources

CURRENT POSITION
- Mr. Al-Oudan is the Executive Vice President for Corporate Human Resources and is the Chairman of Eastern Petrochemical Company (Sharq).

WORKING EXPERIENCE AND PREVIOUS POSITIONS
- During his 20-year career with SABIC, Mr. Al-Oudan has held a number of senior positions. Prior to his current position, he served as General Manager, Global Talent Management, and earlier as General Manager, HR Middle East and Africa. In addition, he was the Director of Global Information Technology Center of Excellence and the Director of Global Information Technology Business Partnership.

EDUCATIONAL QUALIFICATIONS
- Mr. Al-Oudan holds a degree in Management Information Systems from King Saud University, Saudi Arabia.

CURRENT POSITION
- Mr. Al-Abdrabbuh is the Executive Vice-President for Agri-Nutrients and is currently Chairman of the Board of Directors of SABIC affiliate Al-Jubail Fertilizer Co. (Al-Bayroni), Vice Chairman of GPAF Fertilizers Committee, Board Member of Arab Fertilizers Association (AFA), Board Member of International Fertilizers Association (IFA), Member of the Board of Directors and Managing Director of Gulf Petrochemical Industries Corporation (GPIC) and Member of the Board of Directors of National Research and Development Center for Sustainable Agriculture (Estidamah).

WORKING EXPERIENCE AND PREVIOUS POSITIONS
- With over 35 years of experience in the petrochemicals industry, Mr. Al-Abdrabbuh has held a number of senior positions at SABIC, including Vice President, Global Supply Chain, leading SABIC’s Supply Chain strategies in Liquids, Solids, Bulk, Sourcing & Excellence, and Global Value Chain Planning & Optimization.
- Prior to that, he was the Vice President of SABIC’s Oxygenates Business Unit, leading the global business of Methanol, MTBE, NDA, DOP, IBAL, Normal Butanol, iso-Butanol, ACN, NaCN, and MMA.
- Before that, he held the position of Vice President, Global Corporate Communications. As such, he led SABIC’s Global Branding, Global Media, Internal Communications, Events & External Relations, as well as Corporate Social Responsibility.
- Previously, Mr. Al-Abdrabbuh was Executive General Manager of SABIC affiliate TAYF, where he was key to its successful business re-focus, leading a complete operational, financial and legal restructuring and transformation process.
- He has also held a number of prominent leadership positions in SABIC’s wholly owned affiliate Petrokemya, where he successfully led a diverse array of functions covering Technical, Operational, Projects, ERP Implementation and Finance Management roles, as well as having served as Secretary of the Board of Directors.
- In addition, he was earlier the Chairman of the Board of Directors of SABIC affiliates Sabtank and Chemtank, and was Board member of IIBN SINA Company and SHROUQ Company. He had also held the post of Chairman of the Board of Directors of the Asia Clean Fuels Association (ACFA), and Chairman of SABIC affiliate Saudi Organometallic Chemicals Company (SOCC) during its inception and set-up stages.

EDUCATIONAL QUALIFICATIONS
- A graduate of the King Fahd University of Petroleum & Minerals, where he earned a BSc in Computer Science & Engineering, Mr. Al-Abdrabbuh has also completed many professional courses in world-class institutions such as London Business School, UCLA and the University of Michigan.
ANAS KENTAB
Executive Vice President
Europe Repositioning

CURRENT POSITION
- Mr. Kentab is the Executive Vice President for Europe Repositioning. He is the Chairman of the board of Saudi Organometallic Chemicals Company (SOCC), Chairman of the board of United Petrochemical Company United and a member of the boards of SAFCO and SINOPEC SABIC Tianjin Petrochemical Company.

WORKING EXPERIENCE AND PREVIOUS POSITIONS
- Before assuming his present position, Mr. Kentab served as Executive Vice President of the Agri-Nutrient business unit. He has held a number of senior positions at SABIC, including the Vice President of a number of business units (including polyethylene, polypropylene and olefins and industrial gases) and the General Manager of Intermediate Operations and Planning.

EDUCATIONAL QUALIFICATIONS
- Mr. Kentab holds a Bachelor’s degree in Mechanical Engineering from King Saud University in Riyadh. He has undertaken several management and executive leadership programs in GE, Insead, IMD, and London Business School.

ABDULRAHMAN AL-FAGEEH
Executive Vice President
Petrochemicals

CURRENT POSITION
- Mr. Al-Fageeh is the Executive Vice President for Petrochemicals. He is the Chairman of the boards of Al-Jubail Petrochemical Company (KEMYA), Saudi Yansab Petrochemical Company (YANPET) and Gulf Coast Growth Ventures LLC.

WORKING EXPERIENCE AND PREVIOUS POSITIONS
- Before assuming his present position, he was the Executive Vice President of the Polymers and Performance Chemicals Business Unit. He has held a number of senior positions at SABIC, including Vice President of the Polyethylene Business Unit, General Manager of Operations and Planning of the Basic Chemicals Business Unit, General Manager of the Oxygenates Business Unit, President of Yansab and Chairman of the Project Committee of Yansab.

EDUCATIONAL QUALIFICATIONS
- Mr. Al-Fageeh holds a Bachelor’s of Science Chemical Engineering degree from the King Saud University, Riyadh, and an MBA from Bradford University, UK.

TIMOTHY D. LEVEILLE
Executive Vice President
Corporate Finance

CURRENT POSITION
- Mr. Leveille is the Executive Vice President for Corporate Finance and is Chairman of the Board of SABIC Capital B.V.

WORKING EXPERIENCE AND PREVIOUS POSITIONS
- Before assuming his present position, Mr. Leveille was the Vice Chairman of the Board of Directors of Al-Jubail Petrochemical Company (KEMYA), Saudi Yansab, Sadaf and Yansab.

EDUCATIONAL QUALIFICATIONS
- Mr. Leveille holds a Bachelor’s Degree in Accounting from Adelphi University, USA.

BOB MAUGHON, PHD
Executive Vice President
Sustainability, Technology & Innovation

CURRENT POSITION
- Dr. Bob Maughon is the Executive Vice President for Sustainability, Technology & Innovation.

WORKING EXPERIENCE AND PREVIOUS POSITIONS
- Dr. Maughon joined SABIC after an extensive career in various executive transformational positions within the petrochemicals industry.
- Bob began his career with Dow in 1998, working in the Central Research laboratories on a variety of programs ranging from heterogeneous hydrogenation catalysis, ring opening polymerization, homogeneous catalysis, and alternative feedstocks.

EDUCATIONAL QUALIFICATIONS
- Dr. Maughon graduated with a Bachelors in Chemistry from Rice University (USA) and holds a Chemistry PhD from Caltech, USA.

Calx, an international joint venture between Texaco and Chevron that was formed originally in 1936 to market oil from the newly discovered fields in Saudi Arabia.

- Mr. Leveille served in various overseas finance roles in Asia and Africa for roughly 17 years with Calx, including as country Chairman and chief financial officer of Calx Philippines. In 2007, he became vice president of finance for Chevron’s global gas business, and in 2009 senior director of international finance in corporate treasury.

EDUCATIONAL QUALIFICATIONS
- Mr. Leveille holds a Bachelor’s Degree in Accounting and Computer Science from Boston College and a Master’s of Business Administration in Finance from Columbia University School of Business, United States. He is a US certified public accountant (CPA), licensed by the state of New York.

Dr. Maughon was named the director of Inorganic Chemistry & Catalysis, where he was responsible for leading inorganic chemistry, homogeneous and heterogeneous catalysis, and high-throughput research with responsibilities for the development of new technologies for chemical and renewable feedstocks and advantaged catalytic processes.

- From 2008-2010, he served as the lead R&D director for the Hydrocarbons and Energy Business, and from 2010-2013, he served as the R&D director for Dow Pharma & Food Solutions in the Functional Materials Business Group.

EDUCATIONAL QUALIFICATIONS
- Dr. Maughon graduated with a Bachelors in Chemistry from Rice University (USA) and holds a Chemistry PhD from Caltech, USA.

- In 2006, he was named the director of Inorganic Chemistry & Catalysis, where he was responsible for leading inorganic chemistry, homogeneous and heterogeneous catalysis, and high-throughput research with responsibilities for the development of new technologies for chemical and renewable feedstocks and advantaged catalytic processes.

- From 2008-2010, he served as the lead R&D director for the Hydrocarbons and Energy Business, and from 2010-2013, he served as the R&D director for Dow Pharma & Food Solutions in the Functional Materials Business Group.

EDUCATIONAL QUALIFICATIONS
- Dr. Maughon graduated with a Bachelors in Chemistry from Rice University (USA) and holds a Chemistry PhD from Caltech, USA.
MANAGEMENT MEMBERS
BIOGRAPHIES CONTINUED

AWADH AL-MAKER
Executive Vice President
Shared Services

CURRENT POSITION
Mr. Al-Maker is the Executive Vice President for Shared Services. He is Chairman of the boards of National Methanol Company (IBN SINA), Saudi Methacrylates Company (Samac), and Scientific Design (Delaware – USA).

EDUCATIONAL QUALIFICATIONS
Mr. Al-Maker holds a Bachelor’s Degree in Chemical Engineering from King Saud University, Saudi Arabia.

WORKING EXPERIENCE AND PREVIOUS POSITIONS
Prior to his present posting, Mr. Al-Maker has held a number of senior positions at SABIC, including Executive Vice President of Technology and Innovation, Executive Vice President of Manufacturing, Vice President of the Polypropylene Business Unit and President of Yanpet.

AHMAD AL-SHAIKH
Executive Vice President
Manufacturing

CURRENT POSITION
Mr. Al-Shaikh is the Executive Vice President for Manufacturing. He is Chairman of the boards of Hadeed and SINOPEC SABIC Tianjin Petrochemical Company (SSTPC), and a board member of Arabian Petrochemical Company (Petrokemya).

EDUCATIONAL QUALIFICATIONS
Mr. Al-Shaikh holds a Bachelor’s of Science in Electrical Engineering from King Abdulaziz University, Saudi Arabia.

WORKING EXPERIENCE AND PREVIOUS POSITIONS
Mr. Al Shaikh has held a number of senior positions at SABIC, including Vice President of Manufacturing Center of Excellence, President of Yanpet and President of Jubail United Petrochemical Company. With over 25 years of experience in the oil and petrochemical industries, he has also previously worked for Saudi Aramco Shell Refinery.

OMAR AL-AMOUDI
Executive Vice President
Engineering and Project Management

CURRENT POSITION
Mr. Al-Amoudi is the Executive Vice President for Engineering and Project Management. He is the Chairman of the boards of Saudi Kayan Petrochemical Company (Saudi Kayan) and Aluminium Bahrain B.S.C. (ALBA), and a member of the board of Gulf Coast Growth Ventures LLC.

EDUCATIONAL QUALIFICATIONS
Mr. Al-Amoudi holds a Master’s Degree in Chemical Engineering from Drexel University, United States, and a Bachelor’s Degree in Chemical Engineering from King Fahd University of Petroleum and Minerals, Saudi Arabia.

WORKING EXPERIENCE AND PREVIOUS POSITIONS
Mr. Al-Amoudi has held a number of senior positions at SABIC including Executive Vice President of Shared Services, President of Petrokemya and President of Saudi European Petrochemical Company. Previously, he was the Chairman of the board of Specialty Chemicals Company and a member of the boards of Ibn Rushd and National Plastic Company.

ERNESTO OCCHIELLO
Executive Vice President
Specialties

CURRENT POSITION
Ernesto Occhiello is the Executive Vice President for Specialties business.

EDUCATIONAL QUALIFICATIONS
A former professor at the University of Turin in Chemistry of Materials, Mr. Occhiello has co-authored two books, more than 100 scientific papers, and communications to congresses. He is responsible for more than 45 patents and has more than 120 citations in Scifinder. Mr. Occhiello holds a Laurea in Chemistry cum laude from University of Turin.

WORKING EXPERIENCE AND PREVIOUS POSITIONS
Mr. Occhiello previously led SABIC Technology & Innovation as its Executive Vice-President. He later joined Clariant as Chief Executive Officer. Prior to joining SABIC, he served as Global R&D Director of The Dow Chemical Company.

Important Note:
1. Exit the list of senior executives on 31 August, 2019.
2. Joined the list of senior executives on 23 April, 2019.
3. Joined the list of senior executives on 1 September, 2019.

REMUNERATION POLICY

OBJECTIVE

The objective of this policy is to organize the remunerations in a way to attract Board and Committee members with the appropriate scientific, technical, and management expertise, and incentivize them to carry out their roles with the required professionalism and efficiency, taking into consideration SABIC’s business environment and its required skills and capabilities.

The company aims to create an attractive environment to attract and retain talents with required skills and expertise to ensure sustained growth and achievement of the company’s vision. It maintains a remuneration framework for Executive Management that is consistent with the relevant rules, legislation, and best practices.

REMUNERATION PRINCIPLES

Considering the provisions governing the remuneration of the Board of Directors and board committees as stipulated in Companies Law, the Corporate Governance Regulations, the organizational controls and procedures issued in implementation of the Companies Law of the listed joint stock companies, and the Company’s Articles of Association, the remuneration of the members of the Board of Directors, its committees and senior executives, shall be in accordance with the following principles and rules:

A. Board and Committee members

- The Board, based on the recommendations of the Remuneration and Nominations Committee, determines the remuneration of Board members and Committee members based on the following principles:
  - The remuneration shall be consistent with the company’s strategic objectives and an incentive factor for the members to achieve these objectives and enhance the company’s ability to develop and sustain its business.
  - Remunerations should be based on the nature of the company’s business and its size as well as the skills and experience required.

- The remunerations should be a means to attract Board members with the relevant expertise and qualifications to enhance the company’s ability to achieve its objectives.

- Board members are entitled to an annual remuneration not exceeding SAR 200,000 for their membership of the Board. The Board may determine different amounts of such remuneration based on recommendations from the Remuneration and Nominations Committee.

- Board members who are participating in Board committees (including the Audit Committee) are entitled to annual remuneration not exceeding SAR 300,000, whether the member is participating in one or several Committees. The Board may decide otherwise based on the recommendations of the Remuneration and Nominations Committee.

- Committee members (including the Audit Committee) from outside the Board are entitled to annual remuneration of SAR 200,000.

- The company is entitled to claim compensation for damage to its reputation and should take any compensation, or other costs incurred by the company, in the event of:
  - Committing an act of dishonesty, forgery, or violating the laws and regulations of the Kingdom of Saudi Arabia or any other country.
  - Failure to carry out responsibilities and duties resulting in damage to the interests of the company.

- Termination of membership by a decision of the General Assembly – for being absent from three consecutive meetings within one year without a legitimate excuse acceptable to the Board.

- The company is entitled to compensate for damage to its reputation and should take any compensation, or other costs incurred by the company, in the event of:

B. Executive Management

- Based on the recommendation of the Remuneration and Nominations Committee, the Board specifies Executive Management’s remuneration according to the following principles: Remuneration and compensation should:
REMUNERATION
CONTINUED

- Be commensurate with the company’s strategic objectives and be a motivating factor for Executive Management to meet these objectives and enhance the company’s ability to grow and sustain its business.
- Be commensurate with the nature of the company’s business and size as well as with the required skills and experience.
- Enable the company to attract senior executives with skills and qualifications necessary to enable the company to meet its objectives.
- Not cause conflict of interest which might adversely impact the company’s interests and ability to achieve its objectives.

REMUNERATIONS PAID DURING 2019
The annual remuneration of the Board is disbursed after the approval of the general assembly of SABIC’s shareholders. Annual remuneration amounts for the Board members representing the Government (through PIF) are paid to PIF as decided by the Council of Ministers. The aggregate total remuneration paid by SABIC to the members of the Board (including for their membership and/or chairing of Board committees) for the year ended 31 December 2019 is set out below (in SAR):

INTERNAL AUDIT AND COMPLIANCE

INTERNAL AUDIT

The Internal Audit Department carried out planned audits in accordance with the agreed schedule and changes required during the year, as approved by the Board Audit Committee to evaluate, objectively and independently, the adequacy and effectiveness of Internal Control Systems. Furthermore, Internal Audit participated in some special assignments, including, for instance, reviews of compliance with company’s policies with the Compliance Team. SABIC’s Internal Audit Department reports functionally to Board Audit Committee and administratively to Vice Chairman/Chief Executive Officer. In carrying out its duties, the Department has full access to SABIC’s sites around the world, and information, documents and employee-related issues. The Internal Audit Department operates in accordance with international Internal Auditing Standards (IIA Standards) as confirmed by External Quality Assurance & Improvement assessment. Furthermore, Internal Audit maintains an internal quality assurance and improvement program, covering all aspects of the internal audit activities, to evaluate and continuously improve these activities.

- Throughout 2019, Internal Audit Department regularly issued audit progress reports to the Board Audit Committee during the year covering the audit plan progress, audit activities / observations, progress on internal audits’ outcome and overall update / view on internal controls’ effectiveness and related subjects. During 2019, the Internal Audit continued its significant progress made in closing and verifying audit findings along with strengthening the follow-up / closure process.
- The Internal Audit Department continued to pursue the IA Strategy in 2019, with impactful outcome. The four strategic pillars of the IA Department are Audit Functional Excellence, Stronger 3-Lines of Assurance, Broader Technology / Data Analytics; and Talents Focus, which enabled conducting deeper, smarter and faster audits with tangible influence on Governance, Internal Controls & Risk Management across SABIC’s Corporate Functions and Regions. The Department is committed to continuous improvement of the Internal Audit processes through the role of dedicated Audit Expertise Center.
- The Internal Audit Department’s focus on human capabilities remains its top priority; attracting and developing talents and equipping them with required skills and qualifications to perform the audit activities effectively. In 2019, pronounced progress was made in the area of IIA Certifications, whereby a number of auditors added more certifications through a structured preparation program with technical coaching by SABIC IA experts.
- Promoting the 3 Lines of Assurance (3 LOA) model across the company, the IA Leadership team initiated structured engagement sessions with the Company Leadership teams proactively sharing key risks and highlighting internal control themes to watch for and enhance.
- The Certified External Auditor, Ernst & Young, was assigned to audit the accounts of the company for 2019 in addition to reviewing the Internal Control System within the scope of its review of the final financial statements of the company. SABIC Internal Audit kept an active collaboration with the External Auditor, in line with the recognized audit standards, to help fulfilling both missions and adding greater value to the organization.

AUDIT COMMITTEE OPINION

As on 31 December 2019, and based on the Executive Management reports and the content of the external and internal auditors’ reports issued during the year, in our opinion, the Company’s Executive Management has maintained an effective internal control system; and the scope and extent of the audit processes in conjunction with the Audit Committee meeting discussions, have provided reasonable ground for the Committee to formulate this opinion.

COMPLIANCE

SABIC’s Compliance Program establishes a framework to ensure that all our employees act with integrity and comply fully with the laws and regulations of the countries in which we operate, and also adhere to the company’s internal policies that often exceed legal requirements. The SABIC Code of Ethics is the tool that governs how all employees interact with business partners, officials, colleagues and the community. The Code can be found at www.sabic.com/en/about/sabic-code-of-ethics.

Our approach to ethical behavior focuses on adherence to the company’s governance structures, policies and procedures in the most transparent way possible. Senior executives and leaders are keen to serve as role models for other employees in terms of compliance and ethical conduct.

SABIC’s commitment to integrity and compliance goes far beyond simply seeking to prevent the consequences associated with violations, such as penalties and fines. We believe that ethical commitment to business performance is the foundation of the company’s long-term success.

To build the right foundation for ethical compliance and avoiding violations, all employees are required to attend comprehensive compliance training, refresher courses, and special lessons on specific topics based on work duties, such as antitrust legislation, fair employment practices or trade control systems. This training takes various forms, including face-to-face or online training, and the training materials and formats are updated regularly.

SABIC’s Chief Compliance Counsel is responsible for managing the implementation of the compliance program, supported by a team of compliance lawyers and professionals working in each region where we conduct our business. The Chief Compliance Counsel regularly reports to the Audit Committee of the Board on progress at the program level as well as on any significant results.

We encourage employees to report any compliance concerns, and we encourage them to enquire and ask for guidance if there is any doubt. Employees can report to their manager, communicate with global compliance support lines, or through a web-based reporting tool, which provides the option to report concerns, anonymously. All credible reports are processed and investigated as needed, and all questions are responded to and answered in a timely manner.

At SABIC, we have been a key contributor to the global business fight against corruption since 2012 with our founding membership of the Business 20 (B20) Anti-Corruption Task Force, as well as our active participation in the World Economic Forum’s Partnering Against Corruption Initiative. We are routinely asked to speak and lead on these issues at some of the world’s preeminent anti-corruption events.

We continued this activity in 2019 when SABIC hosted a major compliance conference in Riyadh, joined by business and industry leaders. Under the theme ‘Promoting Integrity and Transparency for Growth’, the event provided the Saudi and global business community members in attendance a unique opportunity to connect in the interest of inspiring corporate integrity and compliance practices. More than 400 participants from international and local corporations, government, academia and NGOs joined together to advance governance and compliance practices that can secure business opportunities and investment.

By adding our voice to international anti-corruption efforts, SABIC is finding ways for business to work with other actors to build effective governance institutions, share best practices and technical advice, and ultimately, to improve the human rights of people living in the communities where we operate.

SABIC was also awarded the prestigious Compliance Leader Verification status by Ethisphere Institute, a global leader in defining and advancing standards of ethical business practices. The recognition follows Ethisphere’s comprehensive independent review, evaluation, and validation of SABIC’s Ethics and Compliance program. This permits SABIC to display the Ethisphere Compliance Leader Verification logo as a recognition of the excellence of SABIC’s Ethics and Compliance program and its work in building a Culture of Integrity.
**RELATED PARTY TRANSACTION**

The company assumes marketing and sales of affiliates’ products in various local, regional and global markets through marketing agreements signed with those companies. The company also provides its affiliates with procurement services, involving transportation, warehouse services and delivery of materials related to spare parts through the SABIC Shared Services function. The company, represented by our Shared Services function, provides accounting, human resources, information technology, and engineering services to affiliates under an agreement signed with them.

SABIC’s Legal Affairs, Enterprise Risk Management and Internal Audit departments are designed to safeguard the interests of all SABIC stakeholders, including customers, employees and shareholders, and to manage SABIC’s risks in a way that promotes our 2025 goal of becoming the world’s preferred leader in chemicals.

**Enterprise Risk Management**

Enterprise Risk Management focuses on ensuring a risk mindful culture, addressing key business interruption risks, ensuring a comprehensive consolidated insurance program and improving our data and process governance structure. Internal Audit performs operational review of all aspects of activities in sectors and departments of SABIC and affiliates inside and outside Saudi Arabia. In addition, our Environment, Health, Safety and Security Department is responsible for supporting and protecting the Company and its affiliates in the field of environment, health, safety and security, as well as preparing policies and procedures to comply with relevant laws and regulations.

**DECLARATION BASED ON CORPORATE GOVERNANCE REGULATION**

**BOARD OF DIRECTORS DECLARATIONS**

The Board of Directors acknowledges the following:

- The accounting records were properly prepared.
- The internal control system was founded and implemented effectively.
- There are no doubts on the company’s ability to continue business.

**Article /Clause no.** | **Provision of Article /Clause** | **Reason**
--- | --- | ---
Article 54: Audit Committee Formation, Clause B | The chairman of the audit committee shall be an independent member | The Board of Directors is of the opinion that the formation of the Audit Committee consists of four members, including one independent member of the Board of Directors, and two members from outside the Board, which can achieve independence that enhances the efficiency of the Committee’s work. It should be noted that the Committee chose a member from outside the Board as its Chairman based on its approved regulations.

**Article 95:** Formation of a Corporate Governance Committee | If the Board forms a corporate governance committee, it shall assign to it the competences stipulated in Article (94) of these Regulations. Such committee shall oversee any matters relating to the implementation of governance and shall provide the Board with its reports and recommendations at least annually | Based on Article 50 of the Corporate Governance Regulations, which stipulates that the Board of Directors shall form specialized committees in accordance with the needs of the company and its conditions to enable it to perform effectively, the Board of Directors does not consider it necessary to form a specialized committee on corporate governance. All the other Board committees formed, in carrying out their duties and achieving their objectives, do inherently realize the corporate governance function and objectives. Therefore, reducing the duty of ”governance” to a single Committee on Governance, contravenes the proper governance application and realization.

- There are no penalties, disciplinary actions, precautionary measures, or restrictions imposed on the company by the competent body or by any other supervisory, organizing or legal body.
- SABIC Company already appointed an internal auditor and there is no any recommendation from the Audit Committee.
- There is no conflict between the recommendations of the Audit Committee and the resolutions of the Board of Directors, which included the appointment of the Auditor of the Company and the determination of his fees for the fiscal year 2019.
- Financial Statements 2019 are prepared according to the standards approved by the Saudi Organization for Certified Public Accountants.
- The company did not issue or grant any convertible debt instruments, contractual securities, preemptive rights or similar rights during the fiscal year 2019.
- The company did not issue or grant any conversion or subscription rights under any convertible debt instruments, contractually based securities, warrants or similar rights.
- The company did not redeem, purchase or cancel any redeemable debt instruments.
- The company has not concluded any works or contracts of substantial interest to a member of the Board of Directors, the Senior Executives, or any person related to any of them.
- There are no arrangements or waiver agreements of any salary or compensation by one of the Board members or Senior Executives.
- There are no arrangements or agreements under which a shareholder of the company has waived any rights to dividends.
- Auditors’ report shows that the consolidated financial statements are free of material misstatements, and any reservations toward it.
- The Board of Directors has not issued a recommendation to change the auditor before the expiry of the term for which he was appointed.

**COMPANY DECLARATIONS**

The company acknowledges the following:

- The company applies all the provisions contained in the Rules of Corporate Governance issued by the Capital Market Authority (CMA), except the provisions below:

</table>

Notes:
* NUSANED and SANIC are newly established entities. NUSANED is involved in promoting local business in Saudi Arabia and provides financial and non-financial support. SANIC is established to facilitate the restructuring transaction of Agri-Nutrients business.
** Sabcat, SCFC and Shrouq are in liquidation and controlled by the Liquidator, and Sukuk has been liquidated.
*** Effective 1 October 2019, Sadaf merged with Petrokemya.
**** Among companies that were excluded for consolidating the financial statements.
