

NORYL™ RESINS FOR PUMP IMPELLERS

With a broad portfolio of engineering thermoplastics, SABIC empowers customers to meet stringent functional requirements and regulatory standards — a key reason why leading manufacturers increasingly select these materials as their first choice. NORYL resin delivers exceptional hydrolytic stability for parts exposed to continuous water contact. When reinforced with glass fiber, NORYL resins provide tailor-made dimensional stability, enabling housings and impellers to withstand burst pressures and meet long-term creep and fatigue performance requirements. This combination of reliability and compliance makes SABIC’s solutions not only technically robust but also strategically valuable for manufacturers seeking durable, cost-effective designs.
