

Because #LifeWithinYou

Deserves to thrive in health and safety, we have devised our community-oriented drug prevention strategy.

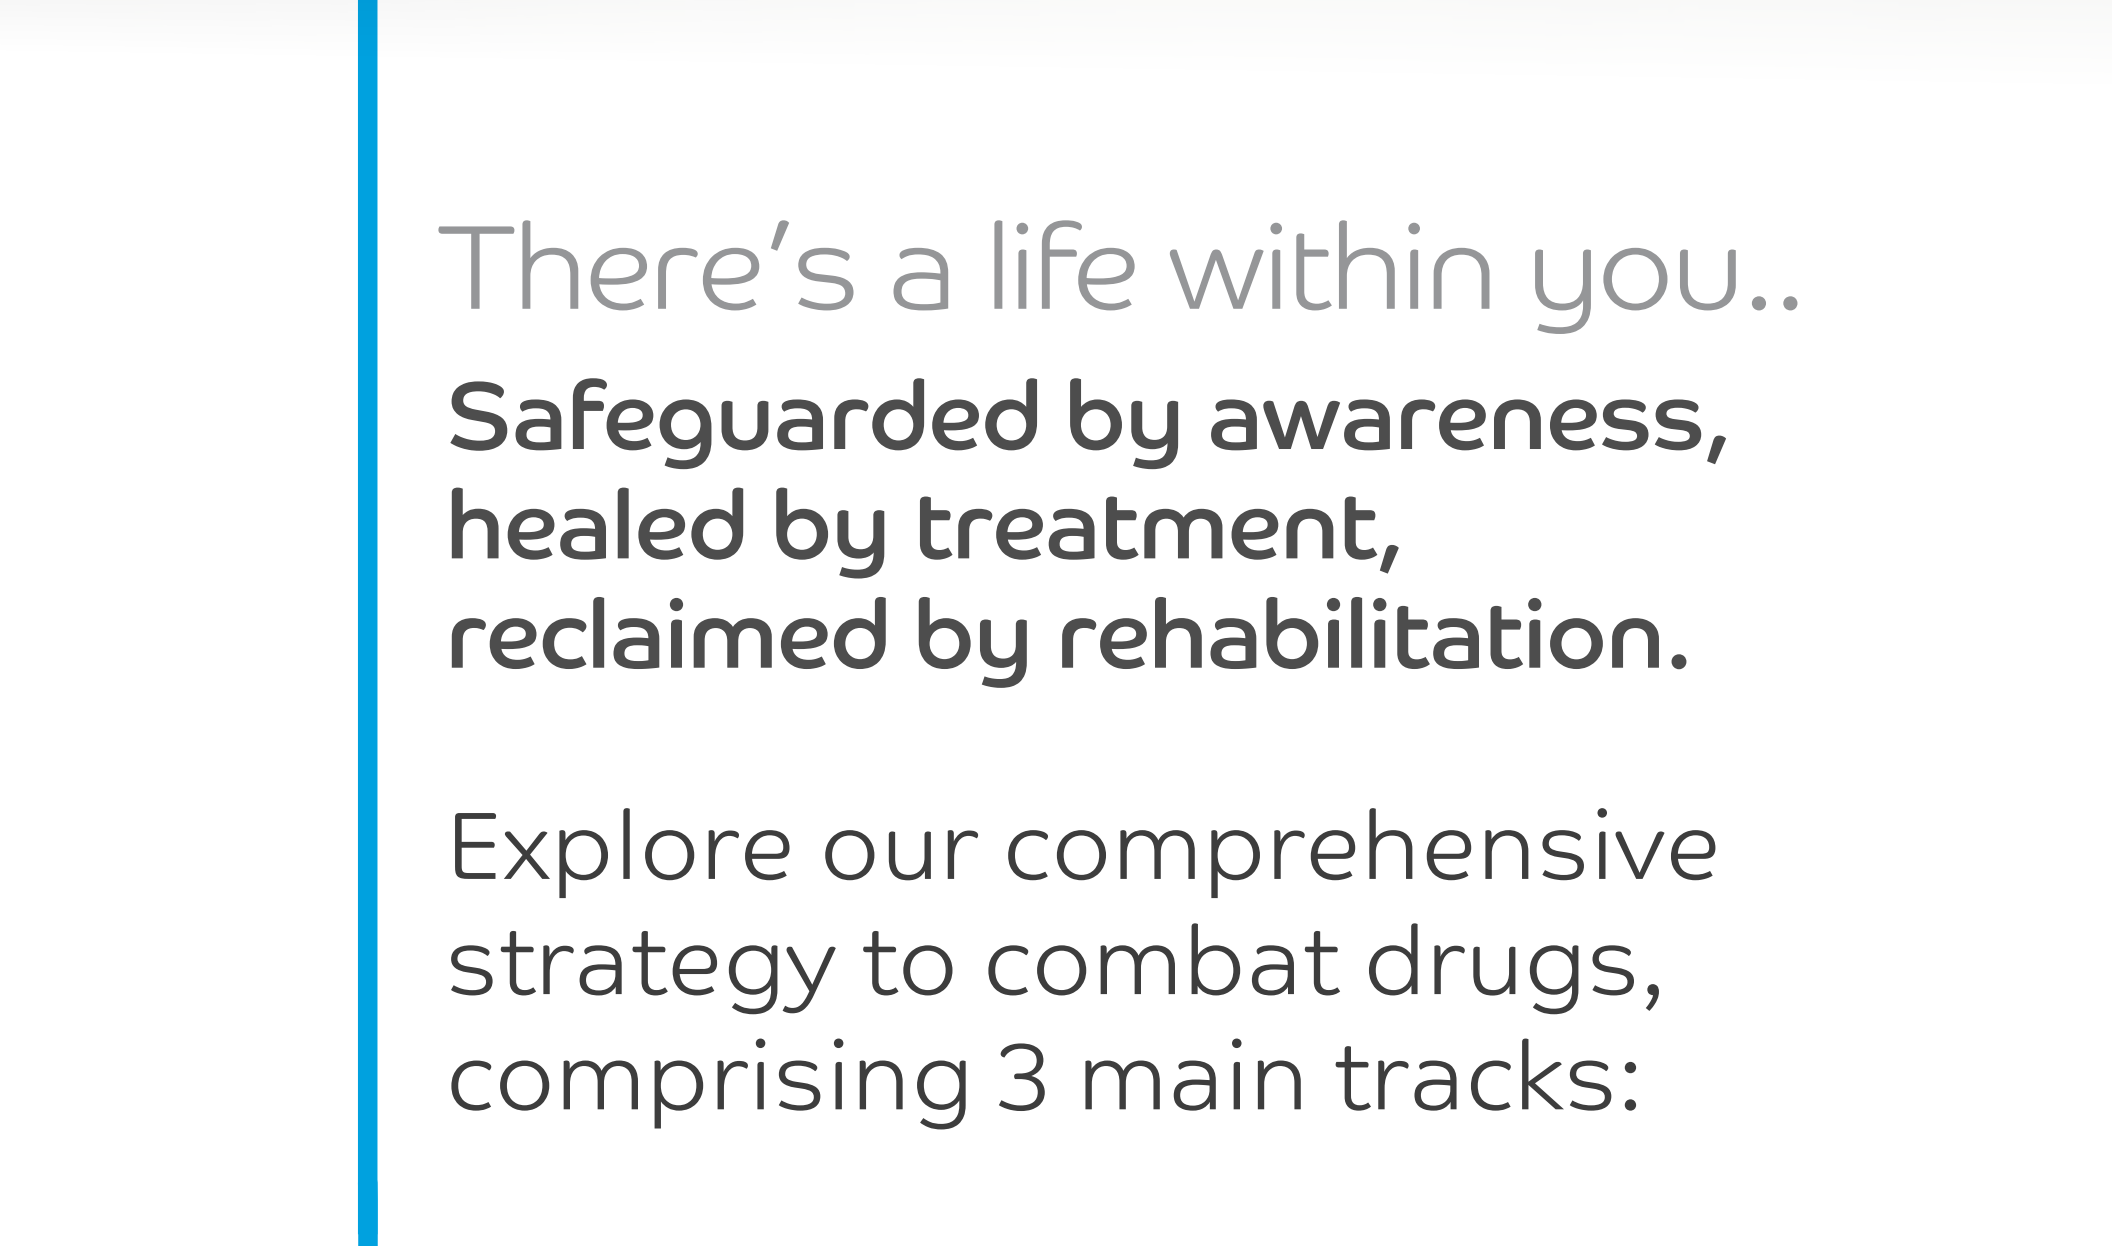

Humanity is our top priority, and their health is the most valuable wealth

Guided by our social responsibility, we are committed to safeguarding this asset. This commitment is what led to the development of SABIC's Drug Prevention Strategy, aimed at making a meaningful contribution towards addressing this issue.

Our promising future is shaped by empowered individuals within a healthy society

We firmly believe that each person in this community deserves a life of complete well-being. That's why we're dedicated to nurturing both mental and physical health.

There's a life within you..

Safeguarded by awareness, healed by treatment, reclaimed by rehabilitation.

Explore our comprehensive strategy to combat drugs, comprising 3 main tracks:

Prevention Track

(SABIC) National Anti-Drug Initiative (Nibras)

Therapeutic Track

Specialized Hospital for Mental Health and Addiction Treatment

Rehabilitation Track

Halfway Rehabilitation Center

(SABIC) National Anti-Drug Initiative (Nibras) has been established in collaboration with the National Committee for Narcotics Control

Towards Enhancing the Safety and Health of the Society

Various programs for all segments of society are aimed at prevention, contributing in:

Curbing drugs proliferation within the community

Empowering family roles with the importance of prevention action

Encouraging active participation from individuals within civil society

Enhance awareness about the perils of drugs and psychoactive substances

Mitigating drug-related crimes among youth

Consolidating government efforts with the private sector

Presented through:

Courses

Developing digital educational games

Awareness events

Translation into multiple languages

The National Anti-drug Initiative offers 4 programs:

Family and Child

Educational Environment

Media
