

# MOLDED IN COLOR IS THE SOLUTION FOR YOU

We excel in new color development for advanced engineering thermoplastics, trusted by businesses worldwide to get it right.

At COLORXPRESS™ Services, we know how crucial color is for your brand. Since 1998, we've specialized in molded-in color solutions for engineering plastics, creating thousands of custom colors annually in various SABIC materials.

Here at COLORXPRESS™ Services, we specialize in the development and creation of molded-in color solutions that meet your design needs. Molded-in color solutions bring guaranteed product performance and consistent color to your overall design, removing the risks associated with post-coloring products at the molder.

## OUR SERVICES

### Request a color match

We are here to help you achieve your desired color using our advanced color match technology.

### Order color chips

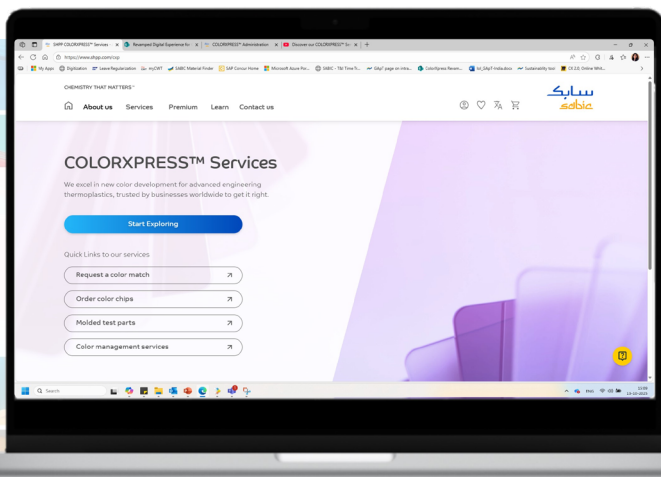

Find a color with our online selection tool which helps you quickly search over 10,000 consistent colors and effect from SABIC.

### Molded test parts

Order molded test parts to evaluate material properties across various products, grades and colors.

### Color management services

With color management services, you can gain worldwide consistency of your color.
