

# MARGARINE CUPS

## SABIC

### SABIC® PP FLOWPACT IMPACT COPOLYMER

---

#### INDUSTRY CHALLENGE

Maintaining cost control and ease of processing while reducing environmental impact of the food packaging that is robust, distinctively shaped and compliant with food safety regulations.

#### SABIC SOLUTION

A lightweight packaging for margarine cups produced with SABIC® PP FLOWPACT impact copolymer enables material savings as the higher stiffness allows for weight reduction of up to 10% without any decrease in top load performance. The material is compliant with food safety regulations and reduces CO2 emission of the packaging due to weight reduction. SABIC® PP FLOWPACT impact copolymer can be processed at lower temperature, enabling fast production cycle times, thus reducing energy consumption.
