

LEXAN™ PC 2K REAR QUARTER WINDOW

Transparent, impact-resistant LEXAN™ resin expands design freedom to support cutting-edge styling and integration of new functionalities, helps control costs and removes weight vs. traditional glass solutions. New opportunities to differentiate vehicles, while simultaneously addressing the longstanding challenges of weight-out, cost-out and sustainability. From 3D shapes like curves and wraparounds, to seamless integrations with parts and functions like rear lighting, door latches, D-pillars and sunroofs, SABIC's LEXAN™ polycarbonate (PC) resins offer exceptional freedom to create differentiated window designs. These tough, impact-resistant, lightweight and crystal-clear materials can replace glass to help the industry achieve multiple objectives.
