

## TACO SPOILER IN CYCOLOY™

Spoilers represent a functional opportunity for automotive designers to incorporate styling while managing aerodynamics of the vehicle's exterior. SABIC engineering thermoplastics blends have a long history of successful use in both painted and molded-in color spoiler applications. Important properties for these large exterior components include high flow for ease of processing, excellent mechanical properties and paintability for attractive aesthetics. CYCOLOY™ PC/ABS grades are having excellent flow/impact/high heat resistance; low temperature ductility. And GELOY™ PC/ASA have excellent weatherability; high gloss, high heat and impact performance; suitability for spoiler applications interior and exterior parts.
