

SABIC FIRST IN INDUSTRY TO LAUNCH POLYCARBONATE BASED ON CERTIFIED RENEWABLE FEEDSTOCK

SABIC is the **first in the industry** to produce ISCC-certified polycarbonate (PC) based on second-generation renewable feedstock. Providing our customers with a substantial carbon footprint reduction.

- Solution responds to increasingly environmental-friendly solutions of our customers, in line with their global sustainability strategies
- Part of SABIC's new portfolio of ground-breaking TRUCIRCLE™ solutions, encompassing the company's circular materials and technologies, including certified renewable polymers
- Certified under the ISCC PLUS certification scheme, based on the mass balance concept

* Only a part of the feedstock used in polycarbonate production is from renewable feedstock. The LCA study has assessed the environmental performance of the renewable route in comparison to the fossil-based route at "Cradle to Gate" as well as "Cradle to Gate + End of Life" scope levels and relies on PAS 2050 methodology for biogenic carbon accounting.

THE CONCEPT

POLYCARBONATE BASED ON CERTIFIED RENEWABLE FEEDSTOCK
