

# FF CALCULATOR TRAINING (ENGLISH)

VERSION 2.1

April 2017

## CONTENT

---

- FF Calculator in web portal
- FF Calculator available in all languages

The FF Calculator is a tool on the SABIC web portal which calculates your values from square meter, square feet or KG into number of sheets / coils or rolls.

In this way we try to help you and calculate the right amount of units to place on line via the SABIC web portal.

The Calculator tool is based on an FF authorization profile, which means only FF customers will see the tool from the header of the screen. From there you can click on it and start all your calculations and find the related SABIC material numbers as well.

**For any further guidance / detailed questions, please contact your customer service**

---

# FF CALCULATOR IN WEB PORTAL

## FF CALCULATOR ON WEB PORTAL

For FF customers only, we will provide authorization profile, so that the FF calculator tool will appear in the blue header in the web portal per 1 May 2017.

The tool is [available in all 10 languages globally](#).

The screenshot displays the SABIC eBusiness Portal interface. At the top left, it says "eBusiness Portal" and "Welcome Test User". On the right, there is a "Log off" link and the SABIC logo. A blue navigation bar contains the following links: Home, Orders, Invoices, Complaints, My Profile, and FF Calculator. The "FF Calculator" link is highlighted with an orange rectangular box. Below the navigation bar, the main content area features a large heading "Welcome to the SABIC eBusiness Portal" and a decorative blue and yellow wavy graphic. In the bottom left, there is a section titled "CONNECT+ INSPIRE" with the text "Building long-term customer value through innovation is what we call". To the right of this text is an image of a laptop.
